

## Evaluation Report for Category B, Subcategory 2.3 Application

**Application Number:** 2021-1621  
**Application:** Changes to EP (Product Chemistry) - Identity of Formulants  
**Product:** Clethodim 240  
**Registration Number:** 32334  
**Active ingredient (a.i.):** Clethodim  
**PMRA Document Number :** 3347651

### Purpose of Application

The purpose of this application was to add an alternate formulant to the two currently registered formulations of Clethodim 240.

### Chemistry Assessment

Clethodim 240 is formulated as an emulsifiable concentrate containing clethodim at a concentration of 240 g/L. This end-use product has a density of 0.96 g/mL and pH of 5-6. The chemistry requirements for this product have been fulfilled.

### Health Assessments

The alternate formulant was considered toxicologically equivalent to the precedent formulant; therefore, no toxicology data were required.

Dietary and occupational exposure assessments were not required for this application.

### Environmental Assessment

The addition of an alternate formulant to the end-use product, Clethodim 240, is not expected to result in an increase in environmental risk.

### Value Assessment

A value assessment was not required for this application.

### Conclusion

The Pest Management Regulatory Agency has completed an assessment of the information provided, and has found the information sufficient to add an alternate formulant to the registered formulations of Clethodim 240.
