## Swish Brite-12

**Sodium Hypochlorite**

**DANGER**

**CORROSIVE TO EYES AND SKIN - Dangerous gas formed when mixed with acid** ACTIVE INGREDIENT: Available chlorine present as sodium hypochlorite 10.3% **READ THE LABEL BEFORE USING**

**NET CONTENTS:** 4, 20, 210L

**FIRST AID:** If splashed in eyes, hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. If on skin or clothing, take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice. If swallowed, call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

**TOXICOLOGICAL INFORMATION:** Treat symptomatically.

**NOTICE TO USER:** This pest control product is to be used only in accordance with the directions on the label. It is an offence under the Pest Control Products Act to use this product in a way that is inconsistent with the directions on the label.

Charlotte Products Limited

P.O. Box 3000, Peterborough, Ontario K9J 8N4

705-740-2880 ext. 248

Made in Canada

### **DIRECTIONS FOR USE:**

To control bacteria and algae in swimming pool waters.

- Maintain recommended daily levels as determined by testing kit.  
Free available chlorine: 1.0 - 3.0 ppm  
pH: 7.2 - 7.8  
Total Alkalinity: 100 - 200 ppm  
Calcium Hardness: 200 - 300 ppm  
“**NOTE:** Check expiry date of the test kit as test results may be inaccurate if used after that date.”
- Initially superchlorinate pool water by adding 1L of Swish Brite 12 Sodium Hypochlorite per 10,000L of pool water. For best results chlorinate at dusk.
- Chlorinate daily to maintain proper chlorine residual with 250 mL of Swish Brite 12 Sodium Hypochlorite per 10,000L of pool water, or as needed.  
**NOTE:** Hot weather, heavy pool usage, and rain may require higher usage rates to maintain proper chlorine residuals.
- Superchlorinate weekly with 1L of Swish Brite 12 Sodium Hypochlorite per 10,000L when average daily temperature is 25°C - 32°C. Otherwise, superchlorinate every other week.
- For visible algae superchlorinate using 2L of Swish Brite 12 Sodium Hypochlorite per 10,000L of pool water. Heavy algae infestation may require dosages up to 3L/10,000L. Vacuum pool when dead algae settles.
- For wading pools, chlorinate daily to maintain a chlorine residual of 3-5 ppm by adding 45 mL of Swish Brite 12 Sodium Hypochlorite per 1,000L of pool water, or as needed.  
**NOTE:** For outdoor pools, chlorine residuals can be protected from destruction by sun’s rays by addition of stabilizer (cyanuric acid).

To sanitize milking equipment:

All surfaces to sanitize should be properly cleaned before application of chlorine solution. Wherever possible, milking utensils should be submerged in Swish Brite 12 Sodium Hypochlorite solution for at least two minutes.

To Sanitize non-porous surfaces: such as milk cans, pails and metallic surface, use 200 ppm available chlorine. All surface should be exposed to the sanitizing solution for a period of at least 2 minutes. There must be a final potable water rinse of any food contact surfaces or equipment treated with concentrations in excess of 200 ppm available chlorine.

Proportions for dilution of Swish Brite 12 Sodium Hypochlorite - 35 mL in 18L of water will result in a 200 ppm active solution.

General Sanitization:

For general sanitization and bleaching - use 6 mL of Swish Brite 12 Sodium Hypochlorite per litre of water. Dilute Swish Brite 12 Sodium Hypochlorite as necessary to obtain required ppm available chlorine. Rinse thoroughly with water all treated surfaces. Do not use Swish Brite 12 Sodium Hypochlorite on silk, wool, mohair, lycra, unfast colours, leather, aluminum and silverware.

**PRECAUTIONS:** KEEP OUT OF REACH OF CHILDREN. Dangerous gas formed when mixed with acid. Do not mix with any other chemical.

**CORROSIVE** to the eye. DO NOT get in eyes. Corrosive to the skin. DO NOT get on skin. Harmful if swallowed or inhaled. Avoid breathing vapour and sprays. Harmful if swallowed. Keep container closed and stored in a cool location away from food or feed. Rinse container thoroughly before discarding. Wear goggles or a face shield, chemical-resistant gloves, long pants, a long-sleeved shirt, shoes and socks when handling this product. Do not reuse.

### **DISPOSAL:**

- Triple or pressure rinse the emptied container thoroughly and add the rinsings to the treatment site.
- Follow provincial instructions for any required additional cleaning of the container prior to disposal.
- Make the empty container unsuitable for further use.
- Dispose of the container in accordance with provincial requirements. Follow provincial instruction for any required additional cleaning of the container prior to its disposal.
- For information on the disposal of unused, unwanted product, contact the manufacture or the provincial regulatory agency. Contact the manufacture and the provincial regulatory agency in case of a spill, and for clean-up of spills.

### **ENVIRONMENTAL HAZARDS:**

This product is toxic to fish and other aquatic organisms. It is not to be used in circumstances that would cause or allow it to enter lakes, streams, ponds, estuaries, oceans or other waters in contravention of federal or provincial regulatory requirements. This registration is granted under the Pest Control Products Act and does not exempt the user from any other legislative requirements. Use of this product and management of any resulting discharge or release of effluents containing this product must also be in accordance with the Fisheries Act and with any other applicable federal or provincial legislation. Consult with provincial regulatory authorities on any authorizations or other requirements for use of this product and management of any resulting discharge or release of effluents containing this product. The requirement of applicable laws should be determined before using the product.
