**READ COMPLETE INSTRUCTIONS BEFORE USING.**

This product effectively kills garden pests on contact. It is emitted in a fog that surrounds the plant killing even hard to reach insects on the underside of leaves.

**DIRECTIONS: SHAKE WELL BEFORE USING.** Hold can on a slight downward angle. Spray plants from approximately 1.25 m away, allowing fog to uniformly drift through the plants, reaching interior leaves and branches. Application will be more effective when air is calm. For earwigs, spray in evening. Earwigs must be hit by spray to be killed. Spray every seven days or until insect pests are gone. This product can be used safely up to harvest time. One container will treat three 6 x 7 m gardens. Use only as directed.
