TEAM ZEBRA 

Zebra 2000 Unit

ENGINE COOLING TREATMENT

The Zebra 2000 Zebra Engine Cooling Treatment unit is a self-timing, 5 minutes per day, copper anode device to control zebra mussel attachment in internal marine and inboard/outboard engine inlet passages.

DIRECTIONS OF USE:

The Zebra 2000 unit device is installed by means of suitable size "T" into the flexible line on the inlet side of a marine engine using barbed hose fittings. Connect to the 12 volt systems as per wiring diagram enclosed. Current draw 0.1 amps. When submerged the unit will electronically cycle automatically 5 minutes per day to control Zebra Mussel attachment.
