Kills on contact the accessible or exposed stages of granary weevils, rice weevils, confused flour beetles, rust-red flour beetles, cadelles, saw-tooth grain beetles, spider beetles, Mediterranean flour moths, cheese skippers, cheese mites, cockroaches, ants, spiders, silverfish, crickets, clover mites and carpet beetles.

DIRECTIONS FOR USE: Handle and apply only as recommended and at recommended rates. PRO® 10-1 Food Processor's Spray contains pyrethrins. When diluted with water, it is highly useful in food warehouses and food storage areas as a space or vapour spray; it gives rapid kill of flying and crawling insects.

Space Spray: For rapid control of flying insects such as flies, moths, mosquitoes, gnats, wasps, hornets, dilute 1 litre of 10-1 concentrate with 39 litres of water. Apply in a good machine adjusted to deliver a fine mist, using 200 mL of diluted material for each 100 m³ of space.

Vapour Spray: Dilute 1 litre of 10-1 concentrate with 9 litres of water for use as fog or vapour spray in special electric or compressed air applicators. Dosages vary with different applicators, but many such generators are designed to give most effective results when the diluted material is used at 200 mL to each 100 m³ of space.

If the whole building is to be fogged or misted, all personnel with the exception of the operator must be evacuated from the premises. Ventilating systems must be shut down. All switches operating any electrical equipment which might function during misting/fogging must be turned off. All fires, flames and pilot lights or other sources of ignition must be extinguished and safely shut off. Cover all exposed food processing equipment before spraying, fogging or misting. **In food processing plants, meat packaging plants and food service establishments,** apply only when plant is not in operation. Remove all food, meat products, ingredients or packaging materials from the room. Spray upwards to all parts of the room especially windows, light sources and other areas where insects are present. Spray only when temperature is less than 32°C. Keep area sealed for at least 30 minutes after each treatment. Do not remain in treated area. Ventilate the building for at least 30 minutes before re-entry. Following ventilation, clean up dead insects. All treated surfaces that may contact meat food products or other food products should be washed and rinsed thoroughly with potable water after treatment and before reuse for food processing.

Surface Spray: Dilute 1 part concentrate with 9 parts of water and apply by sprayer to infested areas each day, especially in cracks and crevices and hiding places such as baseboards, moist areas, openings around sinks, drains and pipes, behind cabinets and storage areas. Spray ant trails around door sills, windows frames or in ant nests. Insects must be contacted to be killed.

Note: Keep product away from fire, open flame, lighted electric bulbs, and other sources of heat. Do not use this oil based spray on tiled floor surfaces or rubber backed rugs. Do not spray varnished or plastic surfaces. Toxic to fish. Avoid contamination of food, feed and water supplies.

In food processing plants and food service establishments, apply only when plant is NOT in operation. Remove all food before treatment. Cover all food processing surfaces and thoroughly clean with potable water before resuming operation. **For meat packing plants**, treat only when plant is NOT in operation. No exposed meat products, ingredients or packaging materials should be kept in the room. Cover food handling equipment. All treated surfaces that may contact meat or other food products should be washed and rinsed thoroughly with potable water after treatment and before reuse for food processing.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN AND ANIMALS. PRODUCT CONTAINS PETROLEUM DISTILLATE. Do not store, pour, or use near open flame. Harmful if swallowed, inhaled or absorbed through skin. Avoid inhalation of spray. Wear mask or respirator when applying spray mist. Wear protective clothing. Avoid contact with skin, eyes and clothing. Wash thoroughly with soap and water after use. Keep container closed and store in a cool place. This product contains a petroleum distillate which is moderately to highly toxic to aquatic organisms. Avoid contamination of aquatic systems during application. Do not contaminate these systems through direct application, disposal of waste or cleaning equipment.

FIRST AID: If on skin or clothing, take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice. **If in eyes**, hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. **If swallowed**, call a poison control centre or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically. This product contains petroleum distillates.

DISPOSAL: Triple- or pressure-rinse the empty container. Add the rinsings to the treatment site. Follow provincial instructions for any required additional cleaning of the container prior to its disposal. Make the empty container unsuitable for further use. Dispose of the container in accordance with provincial requirements. For information on disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.

NOTICE TO USER: This pest control product is to be used only in accordance with the directions on the label. It is an offence under the Pest Control Products Act to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.
