2024-07-15

This registration is granted under the Pest Control Products Act and does not exempt the user from any other legislative requirements. Use of this product and management of any resulting discharge or release of effluents containing this product must also be in accordance with the Fisheries Act and with any other applicable federal or provincial legislation. Consult with provincial regulatory authorities on any authorizations or other requirements for use of this product and management of any resulting discharge or release of effluents containing this product.

FIRST AID

If in eyes: Hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

Take container, label, product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION:

Probable mucosal damage may contraindicate the use of gastric lavage. Measures against shock, respiratory depression and convulsion may be needed.

STORAGE: KEEP FROM FREEZING. Store this product away from food or feed.

DISPOSAL:

1. Triple- or pressure-rinse the emptied container. Add the rinsings to the spray treatment site.
2. Follow provincial instructions for any required additional cleaning of the container prior to its disposal.
3. Make the empty container unsuitable for further use.
4. Dispose of the container in accordance with provincial requirements.
5. For information on disposal of unused, unwanted product contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.
6. Follow provincial instruction for any required additional cleaning of the container prior to its disposal. Make the empty container unsuitable for further use. Dispose of the container in accordance with provincial requirements. For information on disposal of unused, unwanted product, contact Veolia Water Technologies & Solutions Canada GP and the provincial regulatory agency in case of a spill, and for clean-up of spills.

DIRECTIONS FOR USE:

INDUSTRIAL RECIRCULATING WATER SYSTEMS/INDUSTRIAL, COMMERCIAL ORNAMENTAL WATER SYSTEMS

This product is recommended for the control of bacteria, algae and fungi. Add sufficient amount of this product to maintain a free residual of 0.6 to 1.0 ppm free chlorine or 1.0 to 5.0 ppm total chlorine residual. For shock chlorination, the recommended dosage of this product is 50 ppm, based on total system

2023-6811
2024-07-15

volume. This will develop a free chlorine residual of 1 to 2 ppm for a period of 1 to 2 hours. Shock feeding may be on a 24 hour basis but no less than twice per week.

Not for use in ornamental water systems containing fish.

MUNICIPAL WATER TREATMENT OF SEWAGE AND INDUSTRIAL EFFLUENT

1. This product is only to be used in automatic feeding devices designed for wastewater sanitation.
2. Fill and adjust feeding device according to manufacturer's recommendations and monitor chlorine residual/coliform level as required by applicable regulatory agency.
3. On the average, satisfactory disinfection of wastewater effluent can be obtained when the chlorine residual is 0.5 ppm after 15 minutes contact. Although the chlorine residual is the critical factor in disinfection, the importance of correlating chlorine residual with bacteria kill must be emphasized.
