Controls Algae in Swimming Pool Waters During Winter Shutdown

DIRECTIONS FOR USE

1. Initial dosage for pool water having no visible algae is 150 mL per 10,000 liters of pool water.
2. For pool water having visible algae, add 250 mL per 10,000 liters of water. Circulate pool water for a minimum of 6 hours before wintering.

For Covered Pools: Apply dosage as indicated above, dependent upon whether visible algae growth is present.

For Uncovered Pools: Apply dosage as indicated above, dependent upon whether visible algae growth is present. A weekly maintenance dosage of 35 mL per 10,000 liters of water is then recommended.

PRECAUTIONS

DANGER KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Do not mix with any other chemical. Avoid contact with skin and eyes.

FIRST AID

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If swallowed: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

TOXICOLOGICAL INFORMATION: Treat Symptomatically.
