## **NON FOAMING LIQUID MICROBICIDE FOR COOLING WATER**

Aquarian C413 is used to control algae, bacteria and fungi in recirculating commercial and industrial water cooling towers. Aquarian C413 is effective at all pH values and will not cause foam.

### **DIRECTIONS FOR USE**

**DO NOT** Discharge effluent containing this product into sewer system, lakes, streams, ponds, estuaries, oceans, and other waters.

**DO NOT** contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes.

Prior to the use of Aquarian C413 in water cooling towers, systems should be cleaned to remove algal growth, microbiological Slime, and other deposits. Then make an initial slug addition of 140-350 ml of C413 per 10,000 litres of water in the *system*. Repeat initial dosage until control is evident.

Make subsequent slug additions of 40-350 ml of Aquarian C413 per 10,000 litres of water every 2 to 5 days or as needed. The frequency of addition depends upon the relative amount of bleed off and the severity of the microbiological problem. Slug additions should be made in the sump of water cooling towers.

### **PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN**

Do not mix with any other chemical. Harmful if swallowed. Avoid contact with skin and eyes. Wear a long-sleeved shirt and long pants, chemical-resistant gloves during handling, clean-up and repair activities. In addition, a chemical-resistant apron is required for workers handling end-use products in industrial settings. Wash thoroughly after handling. Immediately remove contaminated clothing and wash before reuse.

### **NOTICE TO USER:**

This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Product Act to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.
