NOTICE TO USER

This pest control product is to be used only in accordance with the directions on the label. It is an offence under the *Pest Control Products Act* to use this product in a way that is inconsistent with the directions on the label.

DIRECTIONS FOR USE:

SHAKE BEFORE USING. Within the specified use location, to enhance effectiveness of this product, apply directly to the listed pests where possible. For all labelled uses, treatment must only be repeated after 7 days if pest problem persists or reoccurs. When applied indoors, good sanitary practices should be maintained to prevent re-infestation.

FOR INDOOR USE AT BUILDINGS

USE LIMITATIONS

- DO NOT apply when people or pets are present.
- DO NOT allow people or pets to enter treated areas until sprays have settled dried.
- DO NOT apply to surfaces that may come into contact with food/feed. Cover or remove all food/feed. Cover all food/feed processing surfaces, equipment and utensils or thoroughly wash following treatment. Any food/feed accidentally contaminated with spray solution must be discarded.
- Ventilate treated indoor areas after application by opening windows and doors or using fans where required, to aid in the circulation of air.
- When applied as a surface spray: DO NOT apply to overhead areas or in confined spaces (e.g., attics, crawlspaces, small storage rooms, closets). DO NOT allow spray to drip or allow drift onto non-target surfaces.

HOW TO APPLY

DO NOT APPLY AS A BROADCAST TREATMENT. Apply as a space spray, crack and crevice, indoor perimeter and spot treatment only. Space application is a suspension of fine droplets in the air within an indoor space. Crack and crevice is an application directly into narrow openings on the surface of the structure. It does not include the treatment of exposed surfaces. Narrow openings typically occur at expansion joints, utility entry points and along baseboards and mouldings. Perimeter application is less than 0.3 m wide along the edges of a room to baseboards, wall-floor and ceiling-wall joints, and around doorways or windows.

Spot application is localized to a surface area not more than 0.2 m². Spots are not to be adjoining and the combined area of spots is not to exceed 10% of the total surface area of a room. Furniture treatment: broadcast application covers large areas of the entire surface of items; crack and crevice treatments are applications to junction points on items; spot application is up to 10% of the surface of the item; and tuft and/or seam treatment (mattresses only) is to the junction of two or more pieces of fabric and any decorative trim (e.g., buttons).

INDOOR SPACE APPLICATION

To kill Flies, Mosquitoes, Wasp and Biting midges: Close all windows and doors and shut off all ventilating systems and sources of ignition before treatment. While holding can upright at arm's length, spray upward in sweeping motion to all parts of the room, especially ceiling, upper corners of the room, windows and other light sources. Keep spray at least 1 m from interior walls, fabrics and furniture. Begin application at far side of the room and work backwards toward exit. **DO NOT** exceed 0.71 g of **K-G House & Garden Insect Killer I** per m³(0.3 seconds/m³) per average sized room 30 m³. Vacate the treated area and keep windows and doors closed for 15 minutes, then ventilate thoroughly before re-entry. Following ventilation, clean up dead insects.

INDOOR SURFACE APPLICATION:

DO NOT exceed 25.0 g of **K-G House & Garden Insect Killer I** per m² (12.5 seconds/ m²) for all indoor surface applications.

To kill Cockroaches, spiders, crickets, ants, carpet beetles, centipedes and silverfish.: Thoroughly treat indoor building surfaces, including cracks and crevices in walls, floors and ceilings; along and behind baseboards; walls behind and floors beneath appliances (e.g., refrigerators and stoves) and furniture (e.g., cabinets and storage units); around sinks, drains and pipes; localized areas around garbage cans; and other building elements where listed insects are found. For silverfish, also spray the cracks and crevices in bookcases. Remove all objects before treatment of bookcases where books, clothing, toys, towels and other items are stored. Treated bookcases must be dry before replacing stored items. For ants,

also spray trails, nests and points of entry (e.g., around windows and doors). For spiders and centipedes, also spray localized areas of floors and floor coverings.

TO kill bed bugs: **DO NOT** use on items which can be laundered (e.g., pillows, bedding, toys, clothing, etc.). Remove bedding before treating mattress. Spray mattress, particularly around tufts and seams. Take bed apart and spray the bed frame, springs and all joints. Treated mattress must be dry before replacing laundered bedding. Following ventilation, clean up dead insects.

TO kill Fleas: **DO NOT** apply to furniture (with the exception of pet bedding), mattresses, linens, toys or clothing. Apply to indoor building surfaces, including cracks and crevices in walls and floors; along and behind baseboards, window and door frames; and localized areas of floors and floor coverings. Pet bedding may be entirely treated with this product or replaced with clean, fresh bedding after other listed areas are treated. **DO NOT** spray furniture or carpets that people regularly contact. **DO NOT SPRAY PETS WITH THIS PRODUCT.** Only treat pets with products specifically registered for use on that type of pet. For effective flea and tick control indoors, clean any area used by the pet. Cleaning the areas includes vacuuming floors, carpets, furniture, etc. (discard vacuum bag after use) and washing the pet's bedding, living quarters, and surrounding area

FOR USE ON OUTDOOR ORNAMENTAL PLANTS

Use Limitations

- **DO NOT** apply to plants grown for food or feed (e.g., fruits, vegetables, herbs).
- **DO NOT** apply to any body of water.
- **DO NOT** contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes.
- Avoid application of this product when winds are gusty.

To kill The following sucking insects: Thrips, Leafhoppers, Spotted mites, Lace bugs, Aphids and the following chewing insects: Climbing cutworms, Japanese beetles **on the following plants:** Asters, Begonias, Chrysanthemums, Dahlias, Delphiniums, Gladiolas, Irises, Marigolds, Petunias, Roses, and Snapdragons, Evergreens, Small deciduous trees, Shrubs and Vines. When listed pests first appear, spray to thoroughly cover all foliage, including upper and lower leaf surfaces until damp. **DO NOT** wet plants to the point of runoff or drip. When spraying, hold can 30 cm from plants to avoid wetting the foliage. **DO NOT** exceed 6.0g of **K-G House & Garden Insect Killer I per m² (3s/m²)**

. Apply in early morning or evening – not in direct sunlight. Spray only when air is still and temperature is below 32°C. Use with caution on new growth and on tender young plants and foliage. Test on one or two leaves to determine safety.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Contents under pressure. **DO NOT** place in hot water or near radiators, stoves or other sources of heat. **DO NOT** puncture or incinerate container, or store at temperatures over 50°C. Cover fish bowls and remove pets for one hour when spraying rooms. In homes or dwellings, remove or cover all exposed foods and cooking utensils before spraying. Avoid contact with skin, eyes, clothing. Avoid inhalation of spray. Wash after using. Keep from freezing. **DO NOT** use on Maidenhair ferns. **DO NOT** remain in treated areas after application.

ENVIRONMENTAL PRECAUTIONS: Toxic to aquatic organisms. Toxic to bees. Avoid application around blooming plants. If applications must be made during the blooming period, restrict applications to evening when most bees are not foraging. Toxic to beneficial arthropods (which may include predatory and parasitic insects, spiders, and mites). Minimize exposure to non-target areas.

FIRST AID: In case of contact with eyes hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. In case of contact with skin or clothing take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice. If accidentally swallowed, call a poison control centre or doctor immediately for treatment advice. Do not give any liquid to the person. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically. This product contains petroleum distillates. Vomiting may cause aspiration pneumonia. Skin exposure may cause transient sensations (tingling, burning, itching, numbness). Other symptoms of exposure could include respiratory effects (such as cough, respiratory irritation, or shortness of breath), nausea, headache or dizziness.

STORAGE: Store this product away from food or feed.

DISPOSAL: When container is empty, press button to release all remaining pressure. Wrap and discard empty container in household garbage. **DO NOT** reuse the empty containers. Dispose in household garbage. Unused or partially used products should be disposed at provincially or municipally designated hazardous waste disposal sites.
