DIRECTIONS FOR USE

To be used only in the manufacture of a herbicide which is registered under the Pest Control Products Act.

PRECAUTIONS

PREVENT ACCESS BY UNAUTHORIZED PERSONNEL. Wear protective gloves and face shield when handling. Remove any contaminated clothing immediately. Wash hands and exposed skin thoroughly after handling.

This product contains a petroleum distillate which is moderately to highly toxic to aquatic organisms. Do not contaminate aquatic systems through disposal of waste or cleaning equipment.

FIRST AID

Take container label or product name and Pest Control Product Registration Number with you when seeking medical attention.

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice.

Inhalation: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment.

Ingestion: Call a poison control centre or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

TOXICOLOGICAL INFORMATION

Treat symptomatically.

STORAGE

Do not store at temperatures above 0° C (32°F).

SPILLAGE CLEAN-UP

Liquid evaporates and forms vapor (fumes) which can catch fire and burn with explosive violence. Invisible vapor spreads easily and can be set on fire by many sources such as pilot lights, welding equipment, and electrical motors and switches. Fire hazard is greater as liquid temperatures rises above 29° C(85° F). Products of combustion from fires involving this material may be toxic. If fire is present, avoid breathing smoke and mists. Avoid personnel and

2024-1378
2024-06-04

equipment contact with fallout and runoff. Minimize the amount of water used for fire fighting. Normal combustion forms carbon dioxide, water vapor and may produce oxides of sulfur, nitrogen and toxic chlorine compounds. Incomplete combustion can produce carbon monoxide.

Do not enter any spill area without full protective equipment, including self-contained breathing equipment. Avoid runoff into storm sewers and ditches that lead to waterways. Contain spilled liquids and dry sorbents. After achieving containment, absorb spill (plus any firefighting runoff and debris if present) with inert materials (such as dry sand or earth) then place in a chemical wastecontainer. Wash area with soap and water. Pick up wash liquid with additional absorbent and place in a disposable container. If spilled into any body of water, isolate contaminated water. Remove contaminated water for treatment and/or disposal.

Wash thoroughly after tasks are completed. Discard non-reusable personal protective equipment. Decontaminate personal protective equipment and fire fighting equipment that will be reused.

DISPOSAL

Canadian formulator using this product should dispose of unwanted active ingredient and containers in accordance with municipal or provincial regulations. For additional details and information on clean-up of spills, contact the provincial agency or the manufacturer.

NOTICE TO USER

This pest control product is to be used only in accordance with the directions on the label. It is an offence under the Pest Control Product Act to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.
