### **PRECAUTIONS**

**MAY CAUSE EYE & SKIN IRRITATION** KEEP OUT OF REACH OF CHILDREN

Avoid contact with skin, eyes and clothing. Avoid ingestion and inhalation. Wash hands after handling, after work and before meals.

Wear a long-sleeved shirt, long pants, chemical-resistant gloves, socks and shoes during mixing, loading, application, clean-up and repair. Gloves are not required during application within a closed cab.

Apply only when the potential for drift to non-target areas of human habitation and human activity is minimal. Take into consideration wind speed, wind direction, temperature inversions, application equipment, and sprayer settings.

### **FIRST AID**

If in eyes, hold eye open and rinse slowly and gently for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call poison control centre or doctor for treatment advice.

If on skin or clothing, take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice.

If inhaled, move person to fresh air. If person is not breathing, call 911 or an ambulance, then

give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.

If swallowed, call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

## **TOXICOLOGICAL INFORMATION**

Treat symptomatically.

## **ENVIRONMENTAL PRECAUTIONS**

TOXIC to aquatic organisms and non-target terrestrial plants.

Toxic to birds and small wild animals.

To reduce runoff from treated areas into aquatic habitats, avoid application to areas with a moderate to steep slope, compacted soil, or clay.

Avoid application when heavy rain is forecast.

Contamination of aquatic areas as a result of runoff may be reduced by including a vegetative filter strip between the treated area and the edge of the water body.

## **STORAGE**

Store this product away from food or feed. Keep container tightly closed. Keep container in a cool, well-ventilated area.

## **DISPOSAL**

1. Make the empty container unsuitable for further use.
2. Dispose of the container in accordance with provincial/territorial requirements.
3. For information on disposal of unused, unwanted product, contact the manufacturer or the provincial/territorial regulatory agency. Contact the manufacturer and the provincial/territorial regulatory agency in case of a spill, and for clean-up of spills.

## **GENERAL INFORMATION**

Adios Ambros, mixed with water, may be applied as a post-emergent treatment to provide rapid desiccation of common ragweed (*Ambrosia artemisiifolia*) in areas of high ragweed density including along roadsides, highways and walkways, in vacant lots and industrial areas. The application of Adios Ambros under the conditions outlined in this label results in the loss of turgor pressure in common ragweed plants through the rapid loss of water from cells within plant leaves.

## **DIRECTIONS FOR USE**

As this product is not registered for the control of pests in aquatic systems, DO NOT use to control aquatic pests.

DO NOT contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of

equipment or disposal of wastes.

Applications of Adios Ambros are most effective for the control of common ragweed when applied prior to flower initiation. Flower initiation may occur in common ragweed plants varying in height from as little as 5 cm to more than 1 metre. Smaller common ragweed plants are less likely to experience regrowth following an application of Adios Ambros.

Mix 120 g of Adios Ambros per L of water (150 kg per 1250 L) and apply as a directed spray to common ragweed foliage in a spray volume of 1250 L of water per hectare. Thorough spray coverage of the plant canopy is necessary since Adios Ambros works as a contact herbicide. Foliage that does not receive the spray application will be unaffected. Optimal conditions to apply Adios Ambros include warm temperatures in the mid 20°C range and minimal cloud cover. Observing these conditions may help reduce the need for a subsequent application. Wilting and desiccation of leaves may be observed within 24 hours of the application when applications are made under the conditions described in this label. Some re-growth of common ragweed may occur and a second application may be required to ensure complete control..

**Do not apply in rainy conditions or if rain is forecast within the next 24 hours.**

Field sprayer application: DO NOT apply during periods of dead calm. Avoid application of this product when winds are gusty. DO NOT apply with spray droplets smaller than the American Society of Agricultural Engineers (ASAE S572.1) medium classification. Boom height must be 60 cm or less above the ground.

**DO NOT** apply by air.

A sprayer with directed jets (hand-held nozzle or boom) or a conventional tractor or spray-mount fixed boom is recommended. Provide sufficient agitation during mixing and application to maintain a uniform spray mixture.

Note: Some other species, including grasses and broadleaved plants, may be affected. Do not apply on or near desirable plants such as vegetables or ornamental plants. The effects of Adios Ambros on turfgrass have not been assessed.

#### **NOTICE TO USER**

This control product is to be used only in accordance with the directions on this label. It is an offence under the *Pest Control Products Act* to use this product in a way that is inconsistent with the directions on the label.
