## {OUTER PACKAGING}

[PRIMARY DISPLAY PANEL\_BOX BACK SIDE]

### BIO-GROOM®

**NOTICE TO USER:** This pest control product is to be used only in accordance with the directions on the label. It is an offence under the Pest Control Products Act to use this product in a way that is inconsistent with the directions on the label.

**DIRECTIONS FOR USE: FOR USE ONLY ON DOGS, CATS, AND RABBITS. To control spinose ear ticks and ear mites** and to remove ear wax, apply 10 drops to each ear. Massage base of ear a few minutes to assist penetration of the ear wax by the solution. Allow dog, cat, or rabbit to shake its head. Wipe excess solution from the ear with cotton (e.g., swab, ball, cloth). Avoid contact with dog, cat, or rabbit eyes. For effective mite and tick control, treatment of the pet should be combined with sanitation of any area used by the pet. Vacuum floors, carpets, and furniture (discard vacuum bag after use) and wash the pet's bedding, living quarters and surrounding areas. If pest problems persist, a premise treatment with an insecticide labelled for that use may be required. A veterinarian should be consulted when pest infestation continues to be a problem on the pet. RETAIN PACKAGING INFORMATION FOR FUTURE REFERENCE.

**Use Limitations: DO NOT** use on puppies, kittens, or rabbits under 12 weeks of age. **DO NOT USE ON ANY OTHER ANIMAL. DO NOT** administer by mouth. **DO NOT** use solely for ear-wax treatment when there is no pest problem. **DO NOT** reapply product for 48 hours. Repeat treatment every 48 hours until condition has cleared up or as directed by your veterinarian. Reapply every 2 weeks for continual control of ear mites and ear ticks (and removal of ear wax) in situations where there is an ongoing risk of pest infestation. This product contains pyrethrins and piperonyl butoxide. **DO NOT** apply another pest control product such as a shampoo, spot-on, spray, collar, or powder that contains pyrethrins or piperonyl butoxide to the treated animal after applying Bio-Groom Ear Mite Treatment. Consult a veterinarian before using on sick, aged, pregnant, or nursing animals or animals receiving drug or other pesticide treatment.

#### FIRST AID:

##### HUMANS:

**If Swallowed:** Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

**If Inhaled:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.

**If on Skin or Clothing:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice.

**If in Eyes:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

##### PETS:

Sensitivities may occur after using ANY pesticide for pets. If signs of sensitivity occur, bathe the pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

**TOXICOLOGICAL INFORMATION:** Treat symptomatically.

#### PRECAUTIONS:

**HUMANS:** Harmful if swallowed or inhaled. Avoid contact with skin, eyes or clothing. See leaflet for more information.

**PHYSICAL OR CHEMICAL HAZARDS: DO NOT** use or store near heat or open flame.

**WARNING FLAMMABLE LIQUID AND VAPOR** (insert flammable pictogram with red box and flame symbol inside here)
