BLUEMAGIC™

Bacteriostatic Algaecide

Augments bactericidal activity of primary disinfectants in swimming pools and spas.

DOMESTIC

GUARANTEE: Copper, present as copper sulphate pentahydrate.....5%

REGISTRATION NO. 21870 PEST CONTROL PRODUCTS ACT

DANGER

POISON

EYE AND SKIN IRRITANT
POTENTIAL SKIN SENSITIZER

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Do not get in eyes, on skin or clothing. Wear chemical resistant gloves when handling. Wash the outside of gloves before removing. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Reacts with nylon, cotton, iron and some metals. Store in original plastic container. Do not allow to freeze. Excessive copper levels may stain hair and pool surface due to deposits of copper salts in contact with chlorine oxidizer.

FIRST AID:

If swallowed: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice.

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

Take container or product name and Pest Control Registration Number with you when seeking medical attention

DIRECTIONS FOR USE:

Dilution of 1:60,000 (16ml per 1000 litres of water) provides 1 part per million (1 ppm) copper.

General: When used as directed, BlueMagic provides extended water protection by eliminating algae and increasing bacterial control capacity of primary disinfectants.

When applied to contaminated pools, BlueMagic kills algae and bacteria gradually (one hour to 1-2 days, depending on the organism). BlueMagic, at 1 ppm copper concentration prevents or inhibits the growth of algae and most bacteria. For best results follow instructions for pool/spa water balancing, (test and adjust pH, Total Alkalinity, and Hardness), oxidize organics, monitor primary disinfectant, and maintain copper level at 0.75 to 1 ppm at all times. A combination of BlueMagic and primary disinfectant results in superior water quality. Monitor copper levels with a copper testing kit. Use a sequestering agent to prevent or eliminate precipitation or staining.

Swimming Pools:

Initial treatment: In early spring- before algae proliferates. Balance the water, then apply 1 L BlueMagic to 60,000 L of water.

Maintenance: Test the Copper level every two weeks and add BlueMagic proportionally to maintain approximately 0.75 to 1.0 ppm of copper. Do not allow copper level to drop below 0.5 ppm.

Winter: To close pool, raise copper level to 1.2 ppm.

Spas and Hot Tubs:

Use the same application rate as for swimming pools. Elevated water temperatures require more frequent oxidation, water testing and pH / alkalinity adjustments.

DO NOT contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes.

ENVIRONMENTAL HAZARDS: TOXIC to aquatic organisms. Although copper is an essential trace element in human and animal diets, copper is toxic to fish in very small amounts. Do not apply to waters containing fish. Treated water should not be discharged into lakes, streams or public water without consulting local authorities to ascertain allowable copper levels in the effluent.

DISPOSAL: Rinse container thoroughly before discarding. Do not reuse. For information on the disposal of unused, unwanted product and the cleanup of spills, contact the provincial regulatory agency or the Manufacturer.

NOTICE TO USER: This pest control product is to be used only in accordance with the directions on the label. It is an offence under the *Pest Control Products Act* to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.
