**BioGuard® Power Pucks™** are specially formulated tablets that are designed to meet the rigorous demands of discerning pool owners. The patent-pending formulation improves water quality, sanitizes and clarifies, all in an easy to use tablet. For best results follow the BioGuard Care System.

The BioGuard Care System has three important parts that help you maintain crystal blue sparkling water.

- A sanitizer to control bacteria
- A shock to destroy contaminants
- A preventative algicide to stop algae before it starts

Use all parts of the BioGuard Care System to achieve beautiful water.

### **DIRECTIONS FOR USE**

**Warning:** Direct tablet contact may cause bleaching of vinyl or painted pool surfaces. Automatic feeding devices employing these tablets must be totally free from traces of other pool sanitizers to avoid the probability of an explosion.

1. Maintain recommended daily levels as determined by a testing kit:
  - Free available chlorine: 1.0-3.0 ppm
  - pH: 7.4-7.6
  - Total Alkalinity: 100-120 ppm
  - Calcium Hardness: 200-300 ppm
2. For outdoor pools, chlorine residuals can be protected from destruction by the sun's rays by adding 300 grams of **BioGuard Stabilizer 100** (cyanuric acid) per 10 000 litres of pool water to yield the required initial concentration of 30 ppm.
3. If using an automatic chlorinator, fill the chamber[s] with **BioGuard Power Pucks** and adjust the flow rate, according to manufacturer's recommendations, to maintain proper chlorine residual. Adding **BioGuard Power Pucks** to the pool's skimmer basket is an alternative chlorine feed method. Daily usage should approximate 20 grams of **BioGuard Power Pucks** per 10 000 litres of pool water.

**Note:** Hot weather, heavy pool usage and rain may require higher usage rates to maintain proper chlorine residuals. Use a test kit regularly.
4. Periodic superchlorination of pool water is recommended. Follow label directions of superchlorination product being employed.
5. BioGuard® Power Pucks™ contains stabilizer which can accumulate in pool water. Keep stabilizer level within the range of 30-100 ppm by dilution with fresh water.

**PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN.** Dangerous gas formed when mixed with acid. Do not mix with any other chemical. Strong oxidizing agent. May cause fire or explosion if contaminated. Avoid contact with skin and eyes. It is

recommended to wear rubber gloves when handling this product. Harmful if swallowed. Keep container closed and store in a cool, dry location. Rinse container thoroughly before discarding. Do not reuse.

**FIRST AID:** **If swallowed**, call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. **If on skin or clothing**, take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice. **If in eyes**, hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

**TOXICOLOGICAL INFORMATION:** Treat symptomatically.

**DISPOSAL:** For information on disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.
