PRECAUTIONS HAZARDS TO HUMANS

DANGER

KEEP OUT OF REACH OF CHILDREN

Corrosive: Causes irreversible eye damage. Causes skin burns. May cause allergic skin reaction. Harmful if inhaled. Harmful if absorbed through skin. May be fatal if swallowed.

Do not get in eyes, on skin, or on clothing. Avoid breathing vapour. Do not swallow.

Wear coveralls over long-sleeved shirt and long pants, chemical resistant gloves, socks, chemical-resistant footwear, and goggles during mixing, loading, application, clean-up and repair. Wash thoroughly with soap and water after handling. Use only in well ventilated area. Remove contaminated clothing and shoes and wash them before reuse.

FIRST AID INSTRUCTIONS

If swallowed: Contact a poison control centre or doctor immediately for treatment advice. If the person is fully alert and cooperative, have the person rinse mouth with plenty of water. In cases of ingestion have the person drink 120 - 240 mL (4 to 8 ounces) of water. Do not induce vomiting. Do not attempt mouth rinse if the person has respiratory distress, altered mental status, or nausea and vomiting.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 - 20 minutes. Call a poison control centre or doctor for treatment advice.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.

If in eyes: Wash immediately and continuously with flowing water for at least 30 minutes. Remove contact lenses, if present, after the first 5 minutes and continue washing. Call a poison control centre or doctor immediately for treatment advice.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION:

Aspiration may cause lung damage. Probable mucosal damage may contra-indicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsions may be needed.

DISPOSAL

1. Triple- or pressure-rinse the empty container. Add the rinsings to the treatment site.
2. Follow provincial instruction for any required additional cleaning of the container prior to its disposal or reconditioning.
3. Make the empty container unsuitable for further use.
4. Dispose of the container in accordance with provincial requirements.
5. For information on disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills

STORAGE AND HANDLING:

MAZIDE 7338 Water Treatment Microbiocide solutions are corrosive to many commonly used materials such as steel, galvanized iron, aluminum, tin, and zinc. These solutions can be stored and handled in baked phenolic-lined steel, polyethylene steel, or reinforced epoxy-plastic equipment. This product freezes at about -17°C. Therefore, unless the storage tank is inside or underground, heating and insulating may be required. If heating is needed, exposure to high temperatures should be avoided. For short storage times, (up to about 1 month), temperatures of up to 38°C can be tolerated but preferred maximum storage temperature is about 27°C.

A stainless steel centrifugal pump is suggested for transfer service.

To prevent contamination store this product away from food or feed.

NOTICE TO USER

This pest control product is to be used only in accordance with the directions on the label. It is an offense under the Pest Control Products Act to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.

DIRECTIONS FOR USE

DO NOT contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of waste.

DO NOT discharge effluent containing this product into sewer systems, lakes, streams, ponds, estuaries, oceans or other waters.

DO NOT open pour more than 20 L of concentrate per day. Use an automatic addition system if using more than 20 L of concentrate per day.

AIRWASHER & RECIRCULATING COOLING WATER SYSTEMS:

MAZIDE 7338 Water Treatment Microbiocide may be used only in industrial air washers and air washer systems which have mist-eliminating components. MAZIDE 7338 Water Treatment Microbiocide should be added at the application rate described below to a water treatment system at a convenient point of uniform mixing such as the basin area. Additions may be made intermittently (slug dose) or continuously. Badly fouled systems can be shock treated with MAZIDE 7338 Water Treatment Microbiocide. Under these conditions, blowdown should be discontinued for up to 24 hours.

INTERMITTENT (SLUG DOSE) METHOD

Initial Dose: When the system is noticeably fouled apply 111 - 444 mL of MAZIDE 7338 Water Treatment Microbiocide per 1000 L of water in the system. Repeat until control is achieved.

Subsequent Dose: When microbial control is evident, add 33 - 111 mL of MAZIDE 7338 Water Treatment Microbiocide per 1000 L of water to the system weekly, or as needed to maintain control.

Badly fouled systems must be cleaned before treatment is begun.

CONTINUOUS FEED METHOD

Initial dose: When the system is noticeably fouled, apply 111 - 444 mL of MAZIDE 7338 Water Treatment Microbiocide per 1000 L of water in the system.

Subsequent Doses: Maintain this treatment level by starting a continuous feed of 16 - 333 mL of MAZIDE 7338 Water Treatment Microbiocide per 1000 L of water in the system per day.

Badly fouled systems must be cleaned before treatment is begun.

PASTERIZING COOLING WATER SYSTEMS

AVOID CONTAMINATION OF FOOD IN THE APPLICATION OF PRODUCT.

MAZIDE 7338 Water Treatment Microbiocide should be used at the same application rates and in the same manner as described above. It should be added to the closed recirculating system at a convenient point of uniform mixing such as a basin area, sump area or other reservoir or collecting area from which the treated water will be circulated uniformly throughout the pasteurizer cooling system.

ENVIRONMENTAL HAZARDS

Toxic to aquatic organisms.

This label transcript service is offered by the Pest Management Regulatory Agency to provide efficient searching for label information.
