SpaGuard®

Brominating Concentrate

For Spas & Hot Tubs

SANITIZER

Controls bacteria and algae in spa water.

ACTIVE INGREDIENTS:

DOMESTIC

CAUTION

POISON

CORROSIVE

REG. NO. 25299 P.C.P. ACT

READ THE LABEL BEFORE USING KEEP OUT OF REACH OF CHILDREN

NET CONTENTS: 800 g

KIK HOLDCO COMPANY INC. 33 MacIntosh Blvd. Concord ON L4K 4L5 1-888-640-7946 A level tablespoon contains approximately 12 grams.

SpaGuard[®] **Brominating Concentrate** is a practical, easy to use sanitizer for spa and hot tub water. It rapidly and completely dissolves to provide effective bromine disinfection without cloudy or insoluble residue in the water.

SpaGuard[®] **Brominating Concentrate** is a super oxidation treatment to rid spa and hot tub water of organic waste such as perspiration, body oil, cosmetics, etc., that tend to cloud water.

DIRECTIONS FOR USE:

1. Maintain recommended daily levels as determined by testing kit.

Free available bromine: 3 - 5 ppm

pH: 7.2 - 7.8

Total Alkalinity: 100 - 150 ppm

Calcium Hardness: 100 - 200 ppm

- 2. The filtration system should be maintained in order to ensure proper disinfection.
- 3. Apply 6 g (approx. ½ tablespoon) of **SpaGuard**[®] **Brominating Concentrate** per 1000 L directly to bather-free spa water with circulation system operating. Test for available bromine and repeat above dosage at 15 20 minute intervals until a residual of 3.0 5.0 ppm is reached.
- 4. Periodic superchlorination of spa water is recommended after heavy use or, once a week, in moderately used spas to remove organic waste. Apply 25 g (approx. 2 tablespoons) of **SpaGuard**[®] **Brominating Concentrate** per 1000 L as often as required. Bathers should not use spa until residual reading drops to 6.0 ppm.
- 5. Persistent foam formation, turbid, or malodorous water are indicators of inadequate sanitizer levels. To correct such conditions, superoxidize spa water by adding 25 g (approx. 2 tablespoons) of **SpaGuard**[®] **Brominating Concentrate** per 1000 L of spa water. Maintain circulation at least 30 minutes and wait 4 hours before using. **SpaGuard**[®] **Brominating Concentrate** contains stabilizer (cyanuric acid) which will accumulate in spa water. Keep stabilizer within 30 100 ppm range by dilution with fresh water.
- 6. For proper sanitation, spa must be completely drained periodically. The number of days between COMPLETE SPA DRAINAGE is equal to the volume of spa water in litres, divided by 10 times the maximum number of daily spa users. Refill spa with water and repeat DIRECTIONS FOR USE.
- 7. Maximum spa water usage temperature is 40°C. Duration in spa water, at 40°C, should not exceed 15 minutes.

The lid of this product can be used as a convenient measuring device. A level capful contains approximately 40 g.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Dangerous gas formed when mixed with acid. Do not mix with any other chemical. Strong oxidizing agent. May cause fire or explosion if contaminated. Avoid contact with skin and eyes. It is recommended to wear rubber gloves when handling this product. Avoid breathing dust. Harmful if swallowed. Keep container closed and store in a cool, dry location.

Do not use this product with an electrolysis device (for example, a chlorine generator). Do not use this product with ozonation. Do not use this product with ultraviolet (UV).

FIRST AID:If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice. If swallowed: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

Take container, label, or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically.

DISPOSAL: Rinse container thoroughly before discarding. Do not reuse. For information on the disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.
