POOL AND SPA CHEMICAL COMPANY

200 NORTH SERVICE ROAD WEST, UNIT 1, SUITE 531, OAKVILLE, ONTARIO L6M 2V1

PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN. DANGEROUS GAS FORMED WHEN MIXED WITH ACID. DO NOT MIX WITH ANY OTHER CHEMICAL. STRONG OXIDIZING AGENT. MAY CAUSE FIRE OR EXPLOSION IF CONTAMINATED. AVOID CONTACT WITH SKIN AND EYES. AVOID BREATHING DUST. HARMFUL IF SWALLOWED. KEEP CONTAINER CLOSED AND STORE IN A COOL DRY LOCATION. RINSE CONTAINER THOROUGHLY BEFORE DISCARDING. DO NOT REUSE. FOR INFORMATION ON THE DISPOSAL OF UNUSED UNWANTED PRODUCT AND THE CLEANUP OF SPILLS CONTACT THE PROVINCIAL REGULATORY AGENCY OR THE MANUFACTURER.

WARNING

DIRECT TABLET CONTACT MAY CAUSE BLEACHING OF VINYL OR PAINTED POOL SURFACES. AUTOMATIC FEEDING DEVICES EMPLOYING THESE TABLETS MUST BE TOTALLY FREE FROM TRACES OF OTHER POOL SANITIZERS TO AVOID THE PROBABILITY OF AN EXPLOSION.

FIRST AID

If in eyes, hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. If on skin or clothing, take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice. If swallowed, call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically.

DIRECTIONS FOR USE

BROMINE TABLETS are safe and effective slow dissolving bactericide algicide and disinfectant that, unlike other commonly used chemicals, performs well over a broad pH range. Use the dosages recommended below as a guide in determining the proper amount of BROMINE TABLETS necessary to keep your pool sparkling clean and inviting. The dosage necessary for your pool will change considerably depending upon those factors that burden the disinfection system. Some of the factors that will vary the required dosages are water temperature, bather load, exposure to windblown debris, thunder or rain storms and length of filtration cycle.

SWIMMING POOLS

In newly filled pool, shock the pool if necessary. Follow directions for use on this label to establish an effective active bromine residual of between 1 and 3 ppm; pH 7.2 to 7.8; total alkalinity 100 - 150 ppm; and calcium hardness 200-300 ppm. Test water frequently using a reliable bromine test kit. Adjust the flow rate through the brominator if necessary to maintain the active bromine residual. The following dosages are provided as general rule of thumb. Automatic brominators have use instructions peculiar to their design. Frequently a brominator must be filled to capacity-while the adjustments allow the user to erode only the amount of BROMINE TABLETS necessary for proper sanitation, as suggested below, the slow dissolving nature of the chemical combined with the design features of the brominator require that a greater amount of chemical be exposed to the water.

For shocking purposes use a non-chlorine shock.

Add 1-2 tablets per 10,000 litres. Daily usage should approximate 25 g of BROMINE TABLETS Per 10,000 litres of pool water as needed to maintain a bromine residual of 1-3 ppm at all times. Apply weekly dose through the use of an automatic brominator which will allow you to adjust the amount of bromine entering the water.

Each tablet weighs 24.5 grams.

DISPOSAL:

Do not reuse empty container. Dispose of empty container in household trash. For information on disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.
