DANGER

Convulsive Poison! Poisonous if swallowed. Do not breathe dust. Do not contaminate feed or foodstuffs. Keep away from children, pets, and domestic animals. Wash thoroughly with soap and water after handling and before eating or smoking. Clean clothing should be used daily. All spilled product must be cleaned up immediately.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds, and other wildlife. Do not discharge into lakes, streams, ponds or public waters.

NOTICE TO USER

This pest control product is to be used only in accordance with the directions on this label. It is an offense under the Pest Control Products Act to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.

DIRECTIONS FOR USE

To be used only in the manufacture of a pesticide which is registered under the Pest Control Products Act.

FIRST AID

First Aid Instructions:

If swallowed: Obtain medical attention immediately. Consult a poison control centre for detailed information on treatment for strychnine poisoning. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. If in eyes: Hold eye open and immediately flush with large amounts of water for 15 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. If on skin or clothing: Take off contaminated clothing. Wash exposed area of skin with soap and water. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

Tox Info:

Central nervous system stimulant. Convulsions may occur within 5 to 10 minutes of ingestion. If the person is fully conscious and not convulsing a few moments after the ingestion, immediate ingestion of activated charcoal has been proven beneficial. Keep the patient in a warm, dark room with minimal sensory stimulation. Postpone gastric lavage until the patient is fully premedicated to control further convulsions or seizures. Artificial respiration may become necessary. Keep patient under continual observation until convulsions and reflex irritability have been suppressed and gastric lavage can be performed safely.

DISPOSAL

Canadian manufacturers of this technical should dispose of unwanted active ingredient and containers in accordance with municipal or provincial regulations. For additional details and the cleanup of spills, contact the provincial regulatory agency or the manufacturer.
