NET CONTENTS :

DIRECTIONS FOR USE:

BACBUSTER L10 is a broad-spectrum microbial agent for controlling micro organisms such as bacteria, slime, fungi and algae. The dosage will depend on the type of system , extent of contamination and the degree of control desired.

NOT INTENDED FOR USE IN POTABLE WATER SYSTEMS.

Paper Mills:

Use 30 –50 g active ingredient per metric tonne of dry paper produced at least once per day. BASBUSTER L 10 may be used as a slimicide to the process system (white water) at a maximum level of 100 g per tonne of dry weight fibre, to produce paper or paperboard that may come in contact with foods.

Heat Exchangers, Cooling Towers, Condensers, Air Washers, Pasteurizer (Pasteurizing Tunnel), Cooling Water System, and Food Processing Plants:

Avoid contamination of food in application of this product. Pre-clean heavily fouled systems e.g with chlorine. Shock dosages of 100 ppm active ingredient based on the water content of the system. It may be used until control is achieved. Maintenance dosage 15-50 ppm active ingredient.

Oilfields Applications :

Use 100 ppm active ingredient based on the water content of the system until control is achieved. Maintenance dosage 10-25 ppm active ingredient.

Metal Working Fluids :

Use 0.5- 1.0 kg active ingredient per 10,000 litres .

IN ALL CASES , AVOID SKIN CONTACT, WEAR CHEMICAL RESISTANT GLOVES.

DISPOSAL:

1. Triple or pressure-rinse the empty container. Add the rinsings to the treatment site.
2. Follow provincial instruction for any required additional cleaning of the container prior to its disposal.
3. Make the empty container unsuitable for further use.
4. Dispose of the container in accordance with provincial requirements.
5. For information on disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.
