**PRECAUTIONS: KEEP OUT OF THE REACH OF CHILDREN.** Avoid contact with eyes, skin or mouth. Applicators must wear chemical-resistant gloves during application and removal of the device. Store unused tags in original carton away from heat. Keep the following personal protective equipment immediately available for use in case of emergency (a broken package, spill, or equipment breakdown): chemical-resistant coveralls, chemical-resistant gloves, chemical-resistant footwear and a NIOSH-approved respirator.

**FIRST AID: IF SWALLOWED:** Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. **IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice. **IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

**TOXICOLOGICAL INFORMATION:** The treatment should be primarily symptomatic and supportive. Diazinon is a cholinesterase inhibitor. Atropine is an antidote.

## RETAIN POUCH CARTON FOR USE AND DISPOSAL DIRECTIONS

**GENERAL INFORMATION:** Used as directed, Eliminator Ear Tags will provide season-long control of horn flies and will reduce populations of face flies. Significant gains in weight and milk yield can be achieved with Eliminator. Adequate control of face flies may reduce pink eye infections. This tag contains active ingredients from two different insecticide families and is designed to control the horn flies that may already be resistant to one insecticide family.

**RESISTANCE MANAGEMENT:** The effectiveness of Eliminator Ear Tags on pyrethroid resistant horn fly populations may decrease after a short time of use. The use of this product should conform to current resistance management strategies. For the latest information on horn fly populations and their control strategies in your area, please consult with local Provincial authorities..

## DIRECTIONS FOR USE:

- a) Wear chemical-resistant gloves during product use.
- b) For maximum benefit, apply early each spring before flies emerge. Delaying applications until fly populations have built up may result in some loss of control.
- c) The entire herd must be tagged to control flies as claimed.
- d) Rate to use:           Horn Flies: tag 1 ear                           Face Flies: tag both ears
- e) Remove tags at the end of the season and before slaughter.
- f) Dip pliers with stud into a disinfectant before tagging of each animal.

**APPLICATION PROCEDURE:** Eliminator Ear Tags can be conveniently applied with the ALLFLEX TAGGING SYSTEM™. Assemble unit and position tag on the firm flat surface in the centre of the ear between the ribs. Make sure the shaft of the male tag does not penetrate a rib or blood vessel.

**PRECAUTIONS: KEEP OUT OF THE REACH OF CHILDREN.** Avoid contact with eyes, skin or mouth. Applicators must wear chemical-resistant gloves during application and removal of the device. Store unused tags in original carton away from heat. Keep the following personal protective equipment immediately available for use in case of emergency (a broken package, spill, or equipment breakdown): chemical-resistant coveralls, chemical-resistant gloves, chemical-resistant footwear and a NIOSH-approved respirator.

**FIRST AID: IF SWALLOWED:** Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. **IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice. **IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

**TOXICOLOGICAL INFORMATION:** The treatment should be primarily symptomatic and supportive. Diazinon is a cholinesterase inhibitor. Atropine is an antidote.

**ENVIRONMENTAL HAZARDS:** The active ingredient, diazinon, in Eliminator Ear Tags is highly toxic to fish, birds and bees. The active ingredient cypermethrin is highly toxic to fish and bees. Do not dispose of used tags near a source of water.

**DISPOSAL:**

Dispose of pouch and used tags according to municipal and provincial regulations.

**NOTICE TO USER:** This pest control product is to be used only in accordance with the directions on the label. It is an offence under the Pest Control Products Act to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.
