Wear long-sleeved shirt, long pants, chemical-resistant gloves, , protective eyewear (goggles or face shield), socks and shoes when handling this product.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and other aquatic organisms. This registration is granted under the Pest Control Products Act and does not exempt the user from any other legislative requirements. It is not to be used in circumstances that would cause or allow it to enter lakes, streams, ponds, estuaries, oceans or other waters in contravention of federal or provincial regulatory requirements. The requirements of applicable laws should be determined before using this product. Use of this product and management of any resulting discharge or release of effluents containing this product must also be in accordance with the Fisheries act and with any other applicable federal or provincial legislation. Consult with provincial regulatory authorities on any authorizations or other requirements for use of this product and management of any resulting discharge or release of effluents containing this product.

DISPOSAL

- 1. Triple- or pressure-rinse the empty container. Add the rinsings to the treatment site.
- 2. Follow provincial instructions for any required additional cleaning of the container prior to its disposal.
- 3. Make the empty container unsuitable for further use.
- 4. Dispose of the container in accordance with provincial requirements.
- 5. For information on disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.

STORAGE

Store this product away from food or feed.

DIRECTIONS FOR USE

Weight per tablet - 300 grams

WARNING

Automatic feeding devices employing these tablets must be totally free from traces of other sanitizers to avoid the probability of an explosion.

Recirculating Cooling Tower and Heat Exchange Systems

A clogged or fouled system should be mechanically cleaned to remove all physical soil prior to beginning treatment. Initially, treat by adding enough calcium hypochlorite to provide 10 ppm available chlorine (150 g/10,000 L of product) as a shock dosage and circulate it thoroughly through the system.

Then, for continuous preventative control of algae and slime growth, regularly add enough calcium hypochlorite to the recirculation system to maintain a 1.0 ppm free chlorine residual.

Other water condition factors, such as pH, should be controlled as recommended by the equipment manufacturer.

NOTICE TO USER

This pest control product is to be used in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use product in a way that is inconsistent with the directions on the label.
