NET CONTENTS: Bulk

Syngenta Canada Inc. 140 Research Lane, Research Park Guelph, ON N1G 4Z3 (519) 836-5665

NOTICE TO USER

This pest control product is to be used only in accordance with the directions on the label. It is an offence under the *Pest Control Products Act* to use this product in a way that is inconsistent with the directions on the label.

FIRST AID

IN CASE OF POISONING, contact a physician or a poison control centre **IMMEDIATELY**. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

If swallowed, call a poison control centre or doctor **IMMEDIATELY** for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

If inhaled, move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.

If on skin or clothing, take off contaminated clothing. Rinse skin **IMMEDIATELY** with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice.

If in eyes, hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

TOXICOLOGICAL INFORMATION

Provide symptomatic and supportive therapy as indicated; no specific antidote is available.

Following ingestion, adsorbents such as activated charcoal may be of value. For large quantities, gastric lavage or emesis may be effective if performed within 4 hours of ingestion. However, the need for gastric lavage should be considered carefully, in view of the low acute oral toxicity of this material: it may be better to observe the patient and employ general supportive measures only. If gastric lavage is considered necessary, then inhalation of gastric contents must be prevented (particularly with any non-routine oil-based materials).

PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN AND PREVENT ACCESS BY UNAUTHORIZED PERSONNEL.

Avoid formation of dust clouds in air which are highly sensitive to ignition by small heat sources, such as electrostatic sparks.

Avoid ingestion, contact with skin and eyes and inhalation of airborne dust.

During plant operation and decontamination of spills, the following minimum protective clothing should be worn: cap, safety goggles, PVC or nitrile rubber gloves, coveralls, rubber boots and a dust respirator.

STORAGE

Store in sealed containers in a secure, dry, ventilated area away from direct sunlight and sources of heat and ignition.

DISPOSAL

Wear protective clothing and eye goggles (as described under PRECAUTIONS) to prevent skin and eye contact.

Sweep up the powder, being careful not to create dust. Place sweepings in a metal pail for small spills and a metal drum for large spills. To clean up residual, cover the area with a floor sweeping product and sweep up into an open drum. Repeat if necessary. Seal pails or drums and dispose of contaminated materials in accordance with municipal or provincial recommendations.

Canadian formulators using this product should dispose of unwanted active ingredient and containers in accordance with municipal or provincial regulations. For additional details and information on clean up of spills, contact the provincial regulatory agency or the manufacturer.

IN CASE OF EMERGENCY INVOLVING A MAJOR SPILL, FIRE OR POISONING CALL 1-800-327-8633 (FASTMED)

DIRECTIONS FOR USE

To be used only in the manufacture of a plant growth regulator which is registered under the *Pest Control Products Act*.
