DIRECTIONS FOR USE

General Information: Permethrin is a synthetic version of pyrethrins. Pyrethrins have long been known for rapid knockdown of insects. Although permethrin is more stable than pyrethrins, it is still degraded by the ultraviolet rays of the sun. This results in a relatively short residual life in the presence of sunlight. When protected from the sun, permethrin will provide residual/long lasting activity.

Insectigone® TRIGGER SPRAY CRAWLING INSECT KILLER is ready to use. Its special formula is non-staining, and has no conspicuous odour. Water, not petroleum distillate is used as the diluent. Within the specified use location, to enhance effectiveness of this product, apply this product directly to the listed pest where possible.

Restrictions: DO NOT apply to any body of water. DO NOT contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes. Avoid application of this product when winds are gusty. DO NOT contaminate food/feed. DO NOT apply to surfaces that may come into contact with food/feed. DO NOT apply when people or pets [or livestock] are present. DO NOT allow people or pets [or livestock] to enter treated areas until sprays have dried. DO NOT allow spray to drip or allow drift onto non-target surfaces. DO NOT apply to people, pets, livestock or sources of electricity. DO NOT apply to furniture, mattresses, linens, toys or clothing. DO NOT apply to overhead areas or in confined spaces (for example, attics, crawlspaces, small storage rooms, closets). Ventilate treated areas after application by opening windows and doors, or using fans where required to aid in the circulation of air. DO NOT apply in areas where plants are grown for food or feed (e.g. vegetables, fruit, herbs). DO NOT apply as a space spray or broadcast application.

How to Apply: DO NOT APPLY AS A SPACE SPRAY OR BROADCAST APPLICATION. Shake well before using. Apply as a crack and crevice or spot treatment only to kill Ants, Cockroaches, Silverfish, Spiders, Sowbugs, Aphids, Whiteflies, Leaf Eating Caterpillars, Thrips and Leafhoppers. Spot application is localized to a surface area not more than 0.2 m². Spots are not to be adjoining. The combined area of spots is not to exceed 10% of the total surface area of a room. Crack and crevice is an application directly into narrow openings on the surface of the structure. It does not include the treatment of exposed surfaces. Narrow openings typically occur at expansion joints, utility entry points and along baseboards and mouldings.

Instructions for inside buildings:

To Kill Ants, Cockroaches, Silverfish, Sowbugs and Spiders: Thoroughly treat inside building surfaces, including cracks, crevices in walls, floors and ceilings; along and behind baseboards; around water pipes and tanks; walls behind and floors beneath appliances (e.g., refrigerators and stoves) and furniture (e.g., shelves, drawers, cabinets and storage units); around sinks, drains and pipes; around garbage containers; around interior foundations; localized area around garbage cans; localized areas of floors and floor coverings and points of entry (e.g., around windows and doors). For silverfish, also spray the cracks and crevices in bookcases. Remove all objects before treatment of bookcases where books, clothing, toys, towels and other items are stored. Treated bookcases must be dry before replacing stored items. For ants, also spray trails and nests. Treatment must only be repeated after 7 days if pest problem persists or reoccurs.

For use on indoor ornamental plants:

Aphids and Whiteflies. Wet upper and lower leaf surfaces thoroughly. Safer to use on most plants. Before treating delicate plants, spray 1-2 leaves. If not damage is noticed after 2 days, continue treatment on whole plant. Avoid spraying to point of run-off.

For use on outdoor ornamental plants:

Aphids, Leaf Eating Caterpillars, Thrips and Leafhoppers. Wet upper and lower leaf surfaces thoroughly. Spray when insects are first noticed and then as required. DO NOT apply in areas where plants are grown for food or feed (e.g., vegetables, fruit, herbs).

PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN. Do not use as a space spray. Wash thoroughly before eating, drinking or smoking. Remove fish bowls and cover aquariums before treatment.

FIRST AID

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

If in eyes: hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

If on skin or clothing: take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice.

If swallowed: call a poison control centre or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

ENVIRONMENTAL PRECAUTIONS

Toxic to aquatic organisms. Toxic to birds. Toxic to bees. Toxic to beneficial insects.

TOXICOLOGICAL INFORMATION

Treat symptomatically. This product contains petroleum distillate.

DISPOSAL

Do not reuse empty container. Dispose in household garbage.
