FOR USE ON BEEF AND DAIRY CATTLE (INCLUDING LACTATING) TO CONTROL
HORN FLIES

AGRICULTURAL

READ THE LABEL BEFORE USING

ACTIVE INGREDIENT: Cyfluthrin10%

REGISTRATION No. 26880 PEST CONTROL PRODUCTS ACT

READ THE LABEL AND OUTER BOX BEFORE USING

KEEP OUT OF REACH OF CHILDREN

CAUTION
POISON

NET CONTENTS:
CONTAINS 2 POUCHES,
EACH CONTAINING 10 tags - 13.7 g each

Elanco Canada Limited
1919 Minnesota Court, Suite 401
Mississauga, Ontario L5N 0C9
1-800-265-5475

35
36

NOTICE TO USER: This pest control product is to be used only in accordance with the directions on the label. It is an offence under the Pest Control Products Act to use this product in a way that is inconsistent with the directions on the label.

37
38

DIRECTIONS FOR USE

39
40
41

For the control of Horn Flies on Beef and Dairy Cattle (including lactating).

42
43
44

Apply tags when flies appear in spring. Attach one tag to each ear (two per head) with the Allflex Tagging system. Wear chemical-resistant gloves during application or when otherwise handling the tag.

(illustration)	(illustration)	(illustration)	(illustration)
Figure 1	Figure 2	Figure 3	Figure 4
Disinfect pliers prior to use. Place male button onto pin until it projects through the tip.	Slide tag under the clip of the pliers by depressing the lever.	Position tag in the center portion of the front side of the ear	Apply the tag between the second and third rib cartilage.

45
46
47
48
49
50

All mature animals in the herd should be tagged. Any lost tags should be replaced. Tags provide season long control of Horn Flies (at least four months). Remove tags at the end of the fly season or before slaughter. Leave a one day interval between last treatment and slaughter. Retain carton for use and disposal directions.

51

RESISTANCE MANAGEMENT

52
53
54
55
56
57
58

Cylent Gold Insecticide Cattle Eartag contain the synthetic pyrethroid cyfluthrin (a Group 3 insecticide). Any horn fly population may contain individuals naturally resistant to cyfluthrin and other synthetic pyrethroids. Continuous or repeated exposure to insecticides of this group rapidly selects for resistant flies, eventually leading to the failure of the insecticide to provide satisfactory control. The use of this product should therefore conform to current resistance management strategies. **To delay insecticide resistance:**

59
60
61
62
63
64
65
66

- Where possible, rotate the use of Cylent Gold Insecticide Cattle Ear Tags with or other Group 3 insecticides with different groups that control the same insect pests on cattle.
- Insecticide use should be based on an IPM program that includes scouting, record keeping and considers cultural, biological and other chemical control practices.
- Monitor treated pest populations for resistance development.

- 67
- Consult with local Provincial authorities and extension specialists for advice on any additional pesticide resistance management and/or IPM strategies to control horn fly populations in your area.
- 68
- For further information or to report suspected resistance please contact local provincial authorities or your Bayer representative.
- 69
- 70
- 71
- 72

73 **PRECAUTIONS: KEEP OUT OF REACH OF THE CHILDREN.** May cause eye
74 irritation. Harmful if swallowed, inhaled or absorbed through the skin. Avoid contact with
75 eyes, skin or clothing. Do not contaminate feed or food. Wash thoroughly with soap and
76 warm water after handling and before eating or smoking. This pesticide is toxic to fish.
77 Do not contaminate water when disposing of used tags.

78

79 **FIRST AID: If on skin or clothing,** take off contaminated clothing. Rinse skin
80 immediately with plenty of water for 15–20 minutes. Call a poison control centre or
81 doctor for treatment advice. **If in eyes,** hold eye open and rinse slowly and gently with
82 water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes,
83 then continue rinsing eye. Call a poison control centre or doctor for treatment advice.
84 **If swallowed,** call a poison control centre or doctor immediately for treatment advice.
85 Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not
86 give any liquid to the person. Do not give anything by mouth to an unconscious person.
87 Take container, label or product name and Pest Control Product Registration Number
88 with you, when seeking medical attention.

89

90 **TOXICOLOGICAL INFORMATION:** Skin exposure may cause transient sensations
91 (tingling, burning, itching, numbness). Symptoms of exposure in humans may also
92 include tautness and reddening of facial skin, paraesthesia (elevated sensitivity,
93 particularly to touch) and irritation to the eyes, mouth and throat. No specific antidote is
94 available. Treat the patient symptomatically.

95

96 **STORAGE:** Store in cool place in original container. Opened pouches containing ear
97 tags should be resealed for storage.

98

99 **DISPOSAL:** Dispose of packaging and any used tags in accordance with provincial
100 requirements.
