DIRECTIONS FOR USE

To be used only in the manufacturing (formulating, repackaging, repouring) of a pest control product solely for export from Canada.

PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN AND UNAUTHORIZED PERSONNEL

Fatal or poisonous if swallowed, DO NOT get in eyes, may irritate skin, potential skin sensitizer. Harmful if absorbed through the skin or inhaled. Avoid contact with skin, eyes, or clothing. Avoid breathing vapour or spray mist. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse. Wear a NIOSH-approved cartridge respirator, coveralls over a long-sleeved shirt and long pants, chemical resistant gloves and goggles or a face shield while handling the product (e.g., loading, application, and during clean-up and repair activities). Apply in a well-ventilated area.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and aquatic organisms. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and

runoff from treated areas may be hazardous to fish and aquatic organisms in adjacent aquatic sites. Do not contaminate water when disposing of equipment washwaters.

FIRST AID

Take container, label, or product name and Pest Control Product Registration Number with you when seeking medical attention.

IF IN EYES: Hold eyelids open and flush with water for 15 minutes. Get medical attention if irritation persists.

IF ON SKIN: Wash with plenty of soap and water. Get medical attention if irritation persists.

IF INHALED: Remove person to fresh air. If not breathing, give artificial respiration, preferably mouth-to-mouth. Get medical attention or contact a poison control center.

IF SWALLOWED: Drink promptly a large quantity of milk, egg white, gelatin solution, or if these are not available, large quantities of water. Contact a physician or poison control center.

TOXICOLOGICAL INFORMATION

EMERGENCY MEDICAL TREATMENT: Treat symptomatically. Acute oral overexposure to copper hydroxide, a major component of this product, may cause hypotension, haemolysis, and rarely, methemoglobinemia. Severe intoxication is associated with serum copper levels greater than 500 mcg/dl. Copper hydroxide is emetic, however, dilution with fluids, absorption with activated charcoal, or lavage may be indicated. Chelation therapy with BAL or D-penicillamine has proved useful in cases of acute exposure.

Unless extensive vomiting has occurred, empty the stomach by gastric lavage with water, milk, sodium bicarbonate solution or a 0.1% solution of potassium ferrocyanide (Gosselin, Clinical Toxicology of Commercial Product, 5th edition). Administration of gastric lavage should be performed by qualified medical personnel. Probable mucosal damage may contraindicate use of gastric lavage.

STORAGE

Do not contaminate water, food, or feed by storage or disposal. Store in a cool, dry place. Store above 0°C and protect from freezing.

DISPOSAL

Canadian manufacturers should dispose of unwanted active ingredients and containers in accordance with municipal or provincial regulations. For additional details and clean up of spills, contact the provincial regulatory agency or the manufacturer.

NOTICE TO USER

This pest control product is to be used only in accordance with the directions on the label. It is an offence under the Pest Control Products Act to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.
