The superior absorption and binding capability of Kitty Comfort Plus® allows for complete removal of liquid and solid waste and their associated odours.

Unlike ordinary cat litters, when exposed to liquid waste, Kitty Comfort Plus® granules bond tightly together and won't break apart during removal or when cats scratch in the box! Do not flush waste down the toilet or any waste system.

One box lasts up to 6 months.

Simply replenish the litter that is thrown away. Unused Kitty Comfort Plus® stays in the box and keeps working! One 22.7 kg box of Kitty Comfort Plus® is equal to six 10 kg bags of conventional litter.

DIRECTIONS FOR USE:

1. Pour enough Kitty Comfort Plus® into a clean litter box to cover bottom at least 5 cm (2 inches) deep or approximately 1/3 of this carton to fill a regular size litter box when using for the first time.
2. Remove all urine balls and solid waste from litter box with a sifting scoop. Dispose of waste in trash receptacle.
3. The remaining clean litter will not need to be discarded. Simply add fresh Kitty Comfort Plus® as needed to maintain at least a 5 cm (2-inch) depth.

WARNING: DO NOT FLUSH WASTE OR LITTER DOWN THE TOILET OR ANY OTHER WASTESYSTEM. Keep litter away from food preparation. Do not use this product as a traction aid because product becomes slippery and slick when wet.

DISPOSAL: Dispose of used or unused product with household garbage.

REG. NO. 25698 P.C.P. ACT

GUARANTEE:
Bronopol 0.005%

PRECAUTIONS: Always wash hands thoroughly after preparing or cleaning the litter box. Pregnant and nursing women and people with a suppressed immune system should note that a parasite found in cat faeces can cause toxoplasmosis. They should exercise caution and consult a physician before handling a litter box. For further information, consult your local public health office.
