

TEKTAMER 2200
LIQUID SLIMICIDE

FOR CONTROLLING BACTERIA, FUNGI, AND YEASTS IN PULP AND PAPER MILLS. ALSO FOR THE PRESERVATION OF PIGMENT SLURRIES, ADHESIVES, COATINGS, EMULSIONS AND HIGH VISCOSITY SUSPENSIONS AND FOR PRESERVING AQUEOUS PAINTS, METALWORKING FLUIDS, WAXES AND POLISHES, AND INKS.

DIRECTIONS FOR USE IN PAPER MILLS

For control of bacterial, fungal and yeast growth in pulp, paper and paperboard mills, add TEKTAMER 2200 at the rate of 50mL-250mL (50-250 gm)/tonne of finished pulp or paper produced (dry basis). Addition may be continuous or intermittent, depending upon the type of system and the severity of contamination.

It should be fed with a metering pump at a location that will insure uniform distribution of TEKTAMER 2200 in the mass of fiber and water, such as the beaters, jordan inlet or discharge broke chests, furnish chests, save-alls, and white-water chests. It is preferable to clean a fouled machine before slimicide addition whenever possible.

METHOD OF ADDITION

Systems with a tendency to become severely fouled, or heavily fouled systems, should be thoroughly cleaned and then treated with TEKTAMER 2200 at a rate of 150mL-250mL (150-250 gm)/tonne of finished paper produced until control of the problem is achieved.

Addition rates can then be reduced to a maintenance level.

Maintenance levels for systems conducive to slight or moderate fouling should be treated on an intermittent basis with TEKTAMER 2200 at a level of 50mL-250mL (50-250 gm)/tonne of finished paper produced depending upon observed conditions.

FOR PRESERVATION OF PIGMENT SLURRIES, ADHESIVES, COATINGS, EMULSIONS, AND HIGH VISCOSITY SUSPENSIONS

DOSAGE: TEKTAMER 2200 is effective as a preservative at use of levels of 0.05 - 0.13% (w/w) based on the total formulation in slurries such as: starch, clay, calcium carbonate or titanium dioxide; paper coatings, high viscosity suspensions (e.g. polymers, sizing solutions); adhesives such as: polyvinyl alcohol/polyvinyl acetate based adhesives. The exact amount necessary for the preservation of any given formulation will depend on the components, storage time and temperature, etc., and can be determined by actual test.

METHOD OF ADDITION:

For preservation of slurries and high viscosity suspensions, the material should be added at a point in the processing where there will be sufficient time and agitation for good dispersion.

PRECAUTIONS:

KEEP OUT OF THE REACH OF CHILDREN. DANGER-CORROSIVE TO EYES. CAUSES EYE DAMAGE AND SKIN BURNS. HARMFUL OR FATAL IF SWALLOWED. POTENTIAL SKIN SENSITIZER. DO NOT INHALE OR SWALLOW.

Do not get in eyes, on skin or on clothing. Do not contaminate feed or foodstuffs. Wear goggles or face shield, chemical-resistant gloves, long pants, a long-sleeved shirt, shoes and socks during mixing/loading, clean up, repair, and other handling activities. Users

should wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Users should remove clothing immediately if pesticide comes in contact with skin through soaked clothing or spills. Then wash skin thoroughly and put on clean clothing.

Wash contaminated clothing separate from other laundry prior to reuse. Users should remove protective clothing immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARD:

This product is toxic to fish and other aquatic organisms. It is not to be used in circumstances that would cause or allow it to enter lakes, streams, ponds, estuaries, oceans or other waters in contravention of federal or provincial regulatory requirements. The requirements of applicable laws should be determined before using the product. Do not discharge effluent containing this product into sewer systems without previously notifying the local sewage treatment plant authority.

FIRST AID:

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice.

IF SWALLOWED: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

Take container label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically.

STORAGE: Do not contaminate water, food, or feed by storage or disposal. Keep container tightly closed.

DISPOSAL :

1. Triple or pressure rinse the emptied container thoroughly. Add the rinsings to the spray mixture in the tank.
2. Follow provincial instructions for any additional required cleaning of the container prior to its disposal.
3. Make the empty container unsuitable for further use.
4. Dispose of the container in accordance with provincial/territorial requirements.
5. For information on disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.

NOTICE TO USER: This pest control product is to be used only in accordance with the directions on the label. It is an offence under the *Pest Control Products Act* to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.

This label transcript service is offered by the Pest Management Regulatory Agency to provide efficient searching for label information.
