**Guardex® Advantage Chlor™** are specially formulated granules that are designed to meet the rigorous demands of pool owners. The patent-pending formulation, when applied according to label directions, kills bacteria and algae.

**DIRECTIONS FOR USE:**

**Warning:** Do not apply this product directly to pool water. Apply slowly through skimmer. Direct contact with pool surfaces may cause bleaching of vinyl, paint or fiberglass. Do not pre-dissolve this product before applying through skimmer. Do not mix this product with any other product or chemicals. Always run pump for 2 – 4 hours after application.

1. Maintain recommended daily levels as determined by a testing kit:  
Free available chlorine: 1.0-3.0 ppm                      Total Alkalinity: 100-120 ppm  
PH: 7.2-7.8    Calcium Hardness 200-300 ppm
2. For outdoor pools, chlorine residuals can be protected from destruction by the sun's rays by adding 300 grams of stabilizer (cyanuric acid) per 10,000 L of pool water to yield the required initial concentration of 30 ppm.
3. Initially, chlorinate pool water with 120 g of **Guardex® Advantage Chlor™** per, 10,000 L of pool water. After 2 hours, test chlorine level (residual). Repeat dosage until you obtain a chlorine level of 1.0 – 3.0 ppm.
4. Maintain proper chlorine residual by applying daily, every other day, or as often as needed, 15 – 30 g of **Guardex® Advantage Chlor™** per 10,000 L of pool water to maintain chlorine level of 1.0 – 3.0 ppm. The amount of product required and frequency of addition will vary with the number of swimmers, water temperature and frequency of inclement weather.

**NOTE:** Hot weather, heavy pool usage and rain may require higher usage rates to maintain proper chlorine residuals. Use a test kit regularly.

5. Periodic superchlorination of pool water is recommended. Follow label instructions of superchlorination product being employed.
6. **Guardex® Advantage Chlor™** contains stabilizer which can accumulate in pool water. Keep stabilizer level within the range of 30-100 ppm by dilution with fresh water.

**PRECAUTIONS:** KEEP OUT OF REACH OF CHILDREN. Dangerous gas formed when mixed with acid. Do not mix with any other chemical. Strong oxidizing agent. May cause fire or explosion if contaminated. Corrosive. Causes eye damage and severe skin burns. Do not get on skin, clothing or in eyes. Do not inhale dust. POTENTIAL SKIN SENSITIZER. It is recommended to wear rubber gloves when handling this product. Harmful or fatal if swallowed. Keep container closed and store in a cool, dry location.

**FIRST AID:** If splashed in eyes, hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. If splashed on skin or clothing, take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice.

If swallowed, call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

**TOXICOLOGICAL INFORMATION:** Treat symptomatically.

**DISPOSAL:** Do not reuse empty container. Wrap empty container and discard in household garbage. For information on disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.
