MADE IN CANADA

PENTOX BROWN is a ready-to-use wood preservative containing propiconazole in petroleum solvents. It is used for the preservation and protection of wood against wood-rotting fungi. It is an ideal primer-sealer wood preserver. The treated wood can be stained, painted, or varnished, with

New Text

conventional exterior finishes. It extends the life of the finish and the service from the wood.

DIRECTIONS FOR USE

FOR EXTERIOR USE ONLY. Apply by brush only. Do not spray this product. Apply to wood which is not in ground-contact service. Pentox Brown should not be applied if rain is expected soon after application, and before this product would have a chance to dry. Not for use inside dwellings; do not dilute; ready to use. Treat wood that is dry and clean. Painted, sealed and/or varnished wood must be stripped before treatment. Brush in two liberal applications on wood free from all surface deposits, such as paint, oil, dirt, etc. Heavy lumber requires additional brushed-in treatments. If the wood is left unfinished, repeated applications of Pentox Brown (every 2-3 years) are recommended. Treat all surfaces, including those at fastener holes and cuts. Apply 1 liter per 6 to 8 square meters, depending on the porosity of the wood. Give the wood at least an hour to dry before handling it. Allow the wood to dry thoroughly before staining or painting it - normally six hours. Clean tools with mineral spirits; and then with detergent and water.

PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN and domestic animals. Keep container closed when not in use. Do not apply to children's - playground structures. Keep away from plants, foodstuffs, and water supplies. It's toxic to fish. Avoid contact with skin, eyes, and clothing. Harmful if swallowed, inhaled, or absorbed through skin. Good ventilation is necessary while treating. Wear chemical resistant gloves during handling. NOT FOR USE IN DWELLINGS, farm buildings, saunas, greenhouses, or on horticultural lumber or food surface areas. Do not use as soil sterilant or herbicide. Not recommended for tents, tarps, fabrics, nor any surface where prolonged skin contact will occur. Do not use nor store near heat source, open flame, nor sparking. Store in a cool, dry place. Do not freeze.

DISPOSAL

Do not reuse empty container. Wrap and discard empty can with household garbage.

FIRST AID

IF ON SKIN OR CLOTHING, take off contaminated clothing. Rinse

skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice. IF IN EYES, Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. IF SWALLOWED, Call a poison control centre or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION

Product contains propiconazole and petroleum distillates.

NOTICE TO USER:

This pest control product is to be used only in accordance with the directions on the label. It is an offence under the Pest Control Products Act to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.

This label transcript service is offered by the Pest Management Regulatory Agency to provide efficient searching for label information. This service and this information do not replace the official hard-copy label. The PMRA does not provide any guarantee or assurance that the information obtained through this service is accurate, current or correct, and is therefore not liable for any loss resulting, directly or indirectly, from reliance upon this service.
