Separate Bait Stations From Plastic Frame

BACK LABEL

ANT ROACH & EARWIG GEL BAITS

Raid Ant Roach & Earwig Gel Baits work continuously, 24 hours a day, seven days a week to rid your home of ants, cockroaches and earwigs for up to 4 weeks. For best results, use all 12 baits at one time. To keep ants, roaches and earwigs from returning, replace all baits every four weeks.

DIRECTIONS FOR USE: Separate bait stations from plastic frame. Baits are supplied with peel-off tape to secure to surfaces. Avoid wallpaper or painted surfaces that may be damaged when replacing baits.

FOR INDOOR USE: For thorough ant, cockroach and earwig control, use all 12 baits at one time. Place at least 10 baits in the kitchen and 2 in each bathroom. For **LARGER KITCHENS OR PARTICULARLY HEAVY INFESTATIONS**, we recommend using at least 12-15 baits in the kitchen and 2-4 baits in each bathroom. If you see ants, cockroaches or earwigs in other areas, such as the bedroom or utility room, use additional baits. For best results, place the baits on the floor along baseboards, in corners, under sinks, in cabinets, near plumbing fixtures and beside ant trails. **FOR OUTDOOR USE:** Place baits around building foundations, under porches and shrubbery or throughout vegetable, fruit or flower gardens, wherever ants or earwigs are seen. (Cover each bait station with a brick, board or tile to protect it from rain) (Optional). Replace ALL baits every 4 weeks if ant, cockroach and earwig problems persists. For immediate kill and enhanced control, use baits in conjunction with Raid Ant, Roach & Earwig Killer.

DISPOSAL: Wrap container and place in household garbage.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Apply/use only in areas inaccessible to children and pets. Do not remove bait from container. Avoid contamination of food and feed. Do not place directly over food, utensils, dishes or food preparation surfaces.

FIRST AID: If swallowed, call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically.

For best results place all 12 baits at one time as seen below.

This is how Roach & Earwig GEL Baits work. Ants, cockroaches & earwigs enter.
Eat bait. Crawl away to die.
