GENERAL INFORMATION:

ZODIAC SPOT ON FLEA CONTROL FOR CATS & KITTENS provides relief from flea infestations for 4 weeks by killing flea eggs laid on your pet, thereby effectively breaking the flea life cycle. Adult fleas spend virtually all of their time on the pet and produce vast numbers of eggs which drop off the pet and develop in the environment. Once fleas are apparent on your pet, there is already an infestation of their pre-adult stages in your home. Traditional insecticides kill only the adult fleas, not their eggs.

DIRECTIONS FOR USE: Do NOT use on nursing animals or cats or kittens under 8 weeks of age. Do NOT administer by mouth. Consult a veterinarian before using on sick, aged or pregnant animals or animals receiving drug or other pesticide treatment.

This package contains three monthly 1 mL doses.

1. Remove one applicator tube from package and hold in an upright position. 2. Hold bottom of tube with one hand. 3. With the other hand, snap cap off. Remove cap carefully. 4. Position the tip of the tube on the cat's back between the shoulder blades and squeeze out the entire contents of the tube. Reapply every 4 weeks for continual pest control in situations where there is an ongoing risk of pest infestation. Treatment must only be repeated if pest problem reoccurs. Do not reapply product for 4 weeks. **RETAIN PACKAGING INFORMATION FOR FUTURE REFERENCE.**

After application, through its natural movement, your pet's skin and hair oil carry this product over the pet's body for protection against fleas.

Discontinue use if adverse effects are observed. If condition persists, consult your veterinarian. A veterinarian should be consulted when pest infestation continues to be a problem on the pet. This product is most effective when used as part of a total program aimed at reducing fleas in the cat's environment. For effective flea control, treatment of the cat should be combined with the sanitation of any area used by the cat. Vacuum floor, carpets and furniture (discard vacuum bag after use) and wash the cat's bedding, living quarters, and surrounding areas. ZODIAC flea control products are designed to complement each other in an integrated program for flea management. If pest problems persist, an insecticidal premise treatment (e.g. ZODIAC Premise Sprays) may be required. This product contains (S)-Methoprene. Do not apply another pest control product such as a shampoo, collar, or powder that contains (S)-Methoprene to the treated animal after applying ZODIAC SPOT ON Flea Control for Cats and Kittens.

PRECAUTIONS:

HUMANS:

KEEP OUT OF REACH OF CHILDREN. Harmful if swallowed. Wear rubber gloves when applying. May cause eye irritation. Avoid contact with skin or eyes. Avoid contact with pets until dry. After handling or applying, wash hands (or any other skin that came into contact with the product) with soap and water. Avoid product contact with food, food utensils or places where food is prepared or stored.

PETS: Harmful if swallowed. Avoid contact with cat's mouth, face, eyes and genitals.

Care should be taken to prevent exposure of other pets who may be in close physical contact with the treated animal. Sensitivities may occur after using any pesticide for pets. Smaller animals are more likely to experience an adverse reaction. Observe carefully.

Side Effects: Monitor your cat after application. Side effects may include: skin irritation such as scratching or hair loss at the application site, or changes in behaviour such as agitation or lethargy. Gastrointestinal effects such as drooling, vomiting, or loss of appetite may also occur. If these or other side effects occur consult your veterinarian or Wellmark International at 1-800-688-7378.

FIRST AID:

HUMANS:

IF SWALLOWED, call a poison control centre or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person. IF ON SKIN OR CLOTHING, take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice. Wash affected area with soap and water. IF IN EYES, hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

PETS: If signs of sensitivity occur, bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: This product contains PETROLEUM DISTILLATES. Treat symptomatically.

STORAGE: Store in a cool, dry place.

DISPOSAL: Do not reuse empty container. Wrap and dispose of empty container with household garbage.

NOTICE TO USER: This pest control product is to be used only in accordance with the directions on the label. It is an offence under the Pest Control Products Act to use this product in a way that is inconsistent with the directions on the label.
