Putnam, ON
N0L 2B0

Odours are caused by bacteria. The antibacterial agent controls the bacteria thus eliminating odours.

ELIMINATES ODOURS AND CHANGING!

Odours and changing are problems of the past! The superior absorption and binding ability of this clumping cat litter formulation allow for complete removal of liquid and solid waste and their associated odours.

EASILY REMOVE EVEN LIQUID WASTE!

Unlike ordinary cat litters, when exposed to liquid waste, clumping cat litter granules bond tightly together and won't break apart during removal or when cats scratch in the box! Do not flush waste down the toilet or any water waste system.

Simply replenish the litter that is thrown away. Unused granules stay in the litter box and keep working.

DIRECTIONS FOR USE

Pour enough clumping cat litter into a clean litter box to cover the bottom at least 5 cm (2 inches) deep. Each day remove all urine balls and solid waste from litter box with a sifting scoop. Dispose of waste in trash receptacle. If scooped daily, the remaining clean litter will not need to be discarded. Simply add fresh granules as needed to maintain at least a 5 cm (two-inch) depth.

PRECAUTIONS

Always wash hands thoroughly after preparing or cleaning the litter box. Pregnant and nursing women and people with a suppressed immune system should note that a parasite found in cat feces can cause toxoplasmosis. They should exercise caution and consult a physician before handling a litter box. For further information, consult your local public health office.

DISPOSAL

Dispose of used or unused product with household garbage. **WARNING: DO NOT FLUSH WASTE DOWN THE TOILET OR ANY OTHER WATER WASTE SYSTEM. DO NOT** use this product as a traction aid because product becomes slippery and slick when wet. Keep the litter away from food preparation.
