SIDE PANEL (ENGLISH)

• Quick dissolving oxidation treatment • Completely soluble • Provides effective Bromine sanitation • Promotes water clarity • Eliminates organic waste such as perspiration, body oils, cosmetics, etc.

DIRECTIONS FOR USE: One level tablespoon = 12 g

1. Maintain recommended daily levels as determined by testing kit. Free available bromine: 3.0 - 5.0 ppm pH: 7.2 - 7.8 Total Alkalinity: 100 - 150 ppm Calcium Hardness: 100 - 200 ppm
2. With circulation system operating, add 6 g (approx. 1/2 tablespoon) per 1000 L directly to bather-free water. Test for available bromine and repeat above dosage every 15-20 minutes until a residual of 3-5 ppm is reached.
3. Periodic superchlorination of spa water is recommended after heavy use, or once a week, in moderately used spas to remove organic waste. Add 25 g (approx. 2 tablespoons) per 1000 L as often as required. Bathers should not enter the spa until residual reading drops to 5.0 ppm.
4. Persistent foam formation, turbid, or malodorous water are indicators of inadequate sanitizer levels. To correct such conditions, superchlorinate spa water by adding 25 g of Spa Pure EZ Brom per 1000 L. Maintain circulation at least 30 minutes and wait 4 hours before using.
5. Spa Pure EZ Brom contains stabilizer (cyanuric acid) which will accumulate in spa water. Keep stabilizer within the 30-100 ppm range by dilution with fresh water.
6. For proper sanitation, spa must be completely drained periodically. The number of days between COMPLETE SPA DRAINAGE is equal to the volume of spa water in litres, divided by 10 times the Maximum Number of daily spa users. Refill spa with water and repeat DIRECTIONS FOR USE.
7. Maximum spa water usage temperature is 40°C. Duration in spa water at 40°C should not exceed 15 minutes.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Strong oxidizing agent. May cause fire or explosion if contaminated. Dangerous gas formed when mixed with acid. Do not mix with any other chemical. Avoid contact with skin and eyes. It is recommended to wear rubber gloves when handling this product. Avoid breathing dust. Harmful if swallowed. Keep container closed and store in a cool, dry location.

FIRST AID: IF SWALLOWED, call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. IF ON SKIN OR CLOTHING, take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice. IF IN EYES, hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically.

DISPOSAL: Rinse container thoroughly before discarding. DO NOT reuse. For information on disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.
