SIDE PANEL

DESCRIPTION: Spa Pure Bromine Tablets is a new form of brominating sanitizer for spa and hot tub water. When used as directed, Spa Pure Bromine Tablets will sanitize spa, and hot tub water, keeping it clear and free of odour. Spa Pure Bromine Tablets gives the effectiveness of chlorine without the chlorine odour.

DIRECTIONS FOR USE: WEIGHT PER TABLET: 20 g

1. Maintain recommended daily levels, as determined by testing kit.

Free available bromine: 3.0 - 5.0 ppm

pH: 7.2 - 7.8

Total Alkalinity: 100 - 150 ppm

Calcium Hardness: 100 - 200 ppm

2. If using an automatic feeding device, fill the chamber(s) with tablets and adjust flow rate, according to manufacturer's recommendations, to maintain proper bromine residual. Adding tablets to the spa's skimmer basket is an alternative bromine feed method. Daily usage should be approximately 5 g of Spa Life Bromine Tablets per 1,000 L of spa water. NOTE: Heavy spa usage and higher temperatures may require higher usage rates to maintain proper bromine residuals.

3. Periodic superchlorination of spa water is recommended. Follow label instructions of superchlorination product being employed. The regular use of a good test kit will determine if further adjustments are needed. Do not enter water if the residual is above 5.0 ppm.

NOTE: Persistent foam formation, turbid, or malodorous water are indicators of inadequate sanitizer levels. To correct such conditions, superchlorinate spa water by adding superchlorination product. Maintain circulation at least 30 minutes and wait 4 hours before using. For proper sanitation, spa must be completely drained periodically. The number of days between COMPLETE SPA DRAINAGE is equal to the volume of spa water in litres, divided by 10 times the maximum number of daily spa users. Refill spa with water and repeat DIRECTIONS FOR USE. Maximum spa water usage temperature is 40°C. Duration in spa water at 40°C should not exceed 15 minutes. **DO NOT** contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Corrosive to the eye and skin. DO NOT get in eyes or on skin. Potential skin sensitizer. Dangerous gas formed when mixed with acid. Do not mix with any other chemical. Strong oxidizing agent. May cause fire or explosion if contaminated. Avoid contact with skin and eyes, may result in severe chemical burns. Avoid breathing dust. Poisonous if swallowed. Irritating to nose and throat. Wash hands thoroughly after handling. Remove and wash contaminated clothing. It is recommended to wear rubber gloves and goggles when handling the product.

WARNING: DIRECT TABLET CONTACT MAY CAUSE BLEACHING OF VINYL OR PAINTED POOL SURFACES. AUTOMATIC FEEDING DEVICES EMPLOYING THESE TABLETS MUST BE TOTALLY FREE FROM TRACES OF OTHER POOL SANITIZERS TO AVOID THE PROBABILITY OF AN EXPLOSION.

FIRST AID: If swallowed, call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water or milk if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

If in eyes, hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

If on skin or clothing, take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice.

If inhaled, move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.

Take container or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not discharge where it will drain into lakes, streams, ponds or public water.

PHYSICAL AND CHEMICAL HAZARDS: Strong oxidizing agent. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire and explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with the generation of heat, hazardous gases, and possible fire and explosion. In case of contamination or decomposition do not reseal container. If possible, isolate container in open air or well ventilated area. If necessary flood with large volumes of water.

STORAGE: Keep product dry in tightly closed original container when not in use. Store in a cool dry, well ventilated area away from heat, open flames, sunlight and other chemicals.

DISPOSAL: Rinse empty container thoroughly before discarding. Do not re-use empty container. Wrap and dispose of empty container with household garbage. For information on disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.
