Aqua Chem Granular Pool Shock is a patented, multifunctional product that can be used to kill bacteria and unsightly algae, and clear up cloudy water. This product's patented blend of chlorine, special clarifiers, and filter enhancers, provides the perfect solution for clear inviting pool water. Shock treatment is needed when bather loads are high, water appears hazy or dull, unpleasant odours or eye irritation occurs, or after heavy rain.

DIRECTIONS FOR USE:

Maintain daily levels as determined by test kits:

Free available chlorine: 1-3 ppm

pH: 7.2-7.8

Total alkalinity: 80-120 ppm

Calcium hardness: 200-300 ppm

To minimize bleaching, pre-dissolve required amount of **Aqua Chem Granular Pool Shock** in a plastic pail with concentration not exceeding 350 g per 10 L of water. Always add chemical to water, NEVER water to chemical. Broadcast resulting slurry directly to pool water.

INITIAL START-UP: Add 200 g of **Aqua Chem Granular Pool Shock** per 10,000 litres of pool water. For best results, superchlorinate at dusk.

ROUTINE CHLORINATION: Maintain 1-3 ppm chlorine residual by broadcasting daily over the pool's surface, 40 g of this product per 10,000 litres of pool water, or as needed. **Note:** Hot weather, heavy pool usage, and rain may require higher usage rates to maintain proper chlorine residuals.

SHOCK TREATMENT: Superchlorinate weekly by using 200 g of this product per 10,000 litres of pool water when average daily temperature is 25°-32°C. Otherwise, superchlorinate every other week.

ALGAE TREATMENT: For visible algae, superchlorinate using 500 g of this product per 10,000 litres of pool water. Heavy algae infestation may require dosages up to 700 g of this product per 10,000 litres of pool water. Vacuum pool when dead algae settles.

NOTE: For outdoor pools, chlorine residuals can be protected from destruction by sun's rays by addition of stabilizer. Keep stabilizer within the range of 30-100 ppm by dilution with freshwater.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Strong oxidizing agent. May cause fire or explosion if contaminated. Dangerous gas formed when mixed with acid. Do not mix with any other chemical. Avoid contact with skin and eyes. Rubber gloves should be worn when handling this product. Harmful or fatal if swallowed. Keep container closed and store in a cool, dry location.

DISPOSAL: Do not re-use empty container. Dispose of empty container with household garbage. For information on the disposal of unused, unwanted product and the clean-up of spills, contact the Provincial Regulatory Agency or the manufacturer.

FIRST AID: If swallowed: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice. If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice. If in eyes: Hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. If splashed in eyes or on skin, flush thoroughly with water for 15 minutes. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically.
