ACTIVE INGREDIENT: Imidacloprid 9.1% and Pyriproxyfen 0.46%

REG. NO. 27586 P.C.P. ACT

Contents: One to Six 0.8 mL Tubes

Elanco Canada Limited  
1919 Minnesota Court, Suite 401  
Mississauga, Ontario L5N 0C9  
1-800-265-5475

45 Advantage II Large Cat / Rabbit kills 98-100% of the existing fleas on cats and pet  
46 rabbits within 1 day after treatment. Protection against further flea infestation can last up  
47 to 4 weeks on cats and up to 8 days on pet rabbits.

48 Retreatment at monthly intervals is required if re-infestation is continuous or if flea  
49 control is desired. Fleas, eggs, and larvae are killed following contact with skin debris  
50 from an Advantage II Large Cat / Rabbit treated pet. Advantage II Large Cat / Rabbit  
51 provides multi-stage flea control effectively breaking all flea life-cycle stages for quick  
52 and lasting control of flea populations.

53 Do not shampoo or immerse the animal in water immediately after treatment. The  
54 animal can be shampooed, immersed in water or exposed to rain 3 days after  
55 treatment. Advantage II Large Cat / Rabbit retains its ovicidal and larvicidal efficacy for  
56 up to 4 weeks on cats and up to 8 days on pet rabbits following a shampoo treatment,  
57 swimming or exposure to rain. The adulticidal effect may be shortened by repeated  
58 shampooing, water immersion or exposure to rain. Reapplication on cats may be  
59 required after such activities. Do not reapply before 4 weeks on pet rabbits.

60 The successive feeding activity of fleas on pets may elicit a hypersensitivity skin  
61 disorder known as flea allergy dermatitis (FAD). Treatment of pets with Advantage II  
62 Large Cat / Rabbit rapidly kills fleas and may reduce the incidence of this condition.  
63 For effective flea control, treatment of the pet should be combined with sanitation of any  
64 area used by the pet. Vacuum floors, carpets and furniture (discard vacuum bag after  
65 use) and wash the pet's bedding, living quarters and surrounding areas. If pest  
66 problems persist, an insecticidal premise treatment may be required. A veterinarian  
67 should be consulted when pest infestation continues to be a problem on the pet.

68

#### 69 PRECAUTIONS:

70

71 HUMANS: KEEP OUT OF THE REACH OF CHILDREN. Harmful if swallowed. Causes  
72 eye irritation. DO NOT get in eyes. Avoid contact with skin or clothing. Wear rubber  
73 gloves during application of this product. After handling or applying, wash hands (or any  
74 other skin that came in contact with the product), with soap and water. Avoid contact  
75 with pets until dry.

76

77 PETS: Do not use on cats under 8 weeks of age or on rabbits under 4 months of age.  
78 Care should be taken to prevent exposure of other pets who may be in close physical  
79 contact with the treated animal. Sensitivities may occur after using ANY pesticide  
80 product for pets. Smaller animals are more likely to experience an adverse reaction.  
81 Observe carefully. If signs persist, or become more severe, consult a veterinarian  
82 immediately.

83

Side Effects: Monitor your pet after application. Side effects may include: skin irritation such as scratching or hair loss at the application site, or changes in behaviour such as agitation or lethargy. Gastrointestinal effects such as drooling, vomiting or loss of appetite may also occur. If these or other side effects occur, consult your veterinarian or Elanco at 1-800-265-5475.
--

84

85

86 FIRST AID:

87

88 HUMANS: IF IN EYES, hold eye open and rinse slowly and gently with water for 15–20  
89 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue  
90 rinsing eye. Call a poison control centre or doctor for treatment advice.

91 IF SWALLOWED, call a poison control centre or doctor immediately for treatment  
92 advice. Have person sip a glass of water if able to swallow. Do not induce vomiting  
93 unless told to do so by a poison control centre or doctor. Do not give anything by mouth  
94 to an unconscious person.

95 IF ON SKIN OR CLOTHING, take off contaminated clothing. Rinse skin immediately  
96 with plenty of water for 15–20 minutes. Call a poison control centre or doctor for  
97 treatment advice.

98

99 PETS: If signs of sensitivity occur, bathe the pet with mild soap and rinse with large  
100 amounts of water. If signs continue, consult a veterinarian immediately.  
101 Take container, label or product name and Pest Control Product Registration Number  
102 with you when seeking medical or veterinary attention.

103

104 TOXICOLOGICAL INFORMATION: Treat the patient symptomatically.

105

106 STORAGE: Store container at room temperature.

107

108 DISPOSAL: Wrap empty tube and cap in newspaper and dispose in household  
109 garbage.

110

111 DIRECTIONS FOR USE:

112 This product contains imidacloprid and pyriproxyfen. Do not apply another pest control  
113 product such as a shampoo, collar, or powder that contains imidacloprid or pyriproxyfen  
114 to the treated animal after applying Advantage II Large Cat/Rabbit.

115

116 Do NOT administer by mouth.

117

118 This product is packaged in single dosage tubes. This package contains one to six  
119 monthly 0.8 mL dosages. Do not apply a dosage higher than one 0.8 mL tube at one  
120 time. Treat your cat or pet rabbit monthly in the manner described below. Do not use on  
121 other animals.

122

123 Cats

124

125 Use only on cats 8 weeks of age and older weighing over 4 kg. Do not use on cats  
126 under 8 weeks of age. Repeat every 4 weeks for continual pest control in situations  
127 where there is an ongoing risk of pest infestation.

128

129 Pet Rabbits

130

131 Use only on pet rabbits 4 months of age and older weighing over 4 kg. Do not use on  
132 pet rabbits under 4 months of age. Repeat every 4 weeks for continual pest control in  
133 situations where there is an ongoing risk of pest infestation. Do not retreat earlier than 4  
134 weeks. Do not use on rabbits intended for human consumption.  
135

136 How to Apply

- 137 1. Remove one applicator from the package.
- 138 2. Hold applicator tube in upright position. Pull cap off tube.
- 139 3. Turn cap around and place other end of cap back on tube.
- 140 4. Twist cap to break seal, then remove cap from tube.
- 141 5. Part the hair on the neck at the base of the skull until the skin is visible. Place the  
142 tip of the tube on the skin and squeeze the tube to completely empty the contents  
143 directly on the skin. Do not get this product in your pet's eyes or mouth. The  
144 product is bitter tasting and salivation may occur for a short time if the animal  
145 licks the product immediately after treatment. Treatment at the base of the skull  
146 will minimize the opportunity for the animal to lick the product. Do not allow  
147 recently treated animals to groom each other.
- 148 6. Discard the empty tube as described in "DISPOSAL".

149  
150 Consult a veterinarian before using on sick, aged, pregnant or nursing animals or  
151 animals receiving drug or other pesticide treatment. A veterinarian should be consulted  
152 when pest infestation continues to be a problem on the pet.  
153

154 Until Advantage II Large Cat / Rabbit dries, keep pet off furniture and away from  
155 hardwood floors.  
156
