HOW IT WORKS: Diatomaceous Earth is comprised of diatoms, which are sharp microscopic particles. Insects are killed from internal and external cutting action that also causes dehydration of insect pests. Two food-grade additives are added: one ingredient attracts insect pests into the powder (external action); the other attracts insect pests to eat the powder (internal action). When applied directly, crawling insects are usually killed within 48 hours from cutting action. This fine powder will not stain.

DIRECTIONS FOR USE: RAID® Earthblends Ant & Earwig Dust is effective in controlling many crawling domestic household and garden pests such as: ants, earwigs, crickets, caterpillars, cockroaches, fleas, potato beetles, silverfish, slugs, sowbugs, etc. Flip cap open. Direct application to insects is preferred. Apply by lightly coating or dusting area where insect pests are found or hide such as cracks and crevices, under cabinets, etc. The product remains effective as long as it is present. Use as a powder indoors or out. For best results, use in areas where dust application cannot be affected by heavy rains or high winds. For longer control outdoors, use as a wettable powder with water around foundations, shrubs, flower beds, gardens, etc.

DOSAGE:

Dry: Lightly coat desired area. Suggested rate of 50 g per 10 m². (1 oz. per 65 ft²).

Wet: Apply to point of wetness 75 g in 1 L of water for every 10 m². (2 1/2 oz. in 1 qt. water per 65 ft²).

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Avoid breathing dust. Do not use as a space spray. Avoid contact with eyes.

FIRST AID: If in eyes, hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. If inhaled, move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically.

DISPOSAL: Do not reuse empty container. Dispose of empty container in household garbage.
