ROCIMA™ 404D MICROBICIDE

For Use in the
Manufacture of Paints
to Control Mildew on Paint Film
Suspension

GUARANTEE:

Chlorothalonil (tetrachloroisophthalonitrile) 40.4%

Contains 1,2-benzisothiazolin-3-one at 0.019% as a preservative

COMMERCIAL

REGISTRATION NO. 29647
PEST CONTROL PRODUCTS ACT

WARNING

POISON

KEEP OUT OF REACH OF CHILDREN

READ THE LABEL BEFORE USING

See side panel for additional precautionary statements.

Net Contents: 113.6 Litres

DIRECTIONS FOR USE

This product is a broad spectrum microbicide for control of fungi. Its high degree of activity provides excellent performance characteristics for use as a mildewicide in latex exterior and interior emulsion paints. This product has several desirable properties which are important in manufacturing fungus resistant paints.

These are:

- extremely low water solubility
- low vapour pressure
- fine particle size

Latex Exterior and Interior Emulsion Paints – For exterior paints, use 1.0-2.0 litres per 100 litres. For interior paints, use 0.5-1.0 litres per 100 litres.

RECOMMENDATIONS FOR USING THIS PRODUCT

Latex Emulsion Paints

This product is a 40.4% active aqueous dispersion of chlorothalonil. It can be added in the paint formula during or after letdown.

Generally, 1.0-2.0 litres of this product per 100 litres of exterior paint are sufficient effective mildew control in the paint film. In extreme mildew areas, such as the West Coast, levels of up to 2.0 litres are recommended. Levels of 0.5-1.0 litres have been found effective in interior latex paint. This product, at these recommended levels, may be used as a component of paints used in non-food contact surfaces in food plants.

This product is compatible with zinc oxide in latex paints.

This product can be used with either unmodified or alkyd modified acrylic, vinyl acrylic or polyvinyl acetate latexes.

If a can preservative is used in combination with this product, its compatibility with this product should be examined first. Our studies indicate that certain can preservatives appear to react with this product to produce a yellowing in the can.

NOTICE TO USER

2019-2116
2019-07-18

This pest control product is to be used only in accordance with the directions on the label. It is an offence under *the Pest Control Products Act* to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.

PRECAUTIONS

The following precautions should be observed in handling and using this product.

Do not get in eyes. This product is capable of causing eye damage. Wear goggles or eye shield when handling this product. See First Aid Procedures.

Avoid contact with skin or clothing. See First Aid Procedures.

Do not take internally. Avoid breathing spray mist. May be fatal if inhaled.

Note: This product may produce temporary allergic side effects characterized by redness of the eyes, mild bronchial irritation and redness or rash on exposed skin areas. Persons having allergic reaction should contact a physician, See First Aid Procedures.

Wear goggles or eye shield to protect eyes when handling or using this product.

Use protective barrier cream on exposed skin areas.

Wear gloves and protective clothing when handling or using this product to minimize skin contact.

Do not inhale spray mist – wear a respirator if necessary. Launder outer garments if exposed to dust or spills. Discard footwear which cannot be decontaminated.

ENVIRONMENTAL HAZARDS

2019-2116
2019-07-18

This product is toxic to fish. Keep out of lakes, streams or ponds.

STORAGE AND DISPOSAL

Storage:

Store this product in a cool place. Protect from excessive heat.

This product may congeal or stratify when exposed to temperatures below its pour point. Should this occur, allow the container to warm to room temperature and mix well before using. Do not contaminate water, food or feed by storage or disposal.

DISPOSAL

1. Triple- or pressure-rinse the empty container. Add the rinsings to the treatment site.
2. Follow provincial instruction for any required additional cleaning of the container prior to its disposal.
3. Make the empty container unsuitable for further use.
4. Dispose of the container in accordance with provincial requirements.
5. For information on disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.

FIRST AID

IF SWALLOWED: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice.

ALLERGIC REACTIONS: Contact a physician **IMMEDIATELY** for treatment with antihistamines or steroid creams and/or systemic steroids.

2019-2116
2019-07-18

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION:

Probable mucosal damage may contraindicate the use of gastric lavage. Persons having a temporary allergic reaction respond to treatment with antihistamines or steroid creams and/or systemic steroids.
