Go Green Doktor Doom Granular Bait D is a ready to use bait for the control of cockroaches and ants in homes.

DIRECTIONS FOR USE:

APPLY PRODUCT ONLY IN AREAS INACCESSIBLE TO CHILDREN AND PETS.

General treatment: Use a mechanical spreader or applicator suitable for granular products to apply at a rate of 20 g per square metre of surface area, out of the reach of children and pets. Spread evenly in crawl spaces, attics, drop ceilings, and cellars with dirt or gravel floors. In attics, be sure to apply in eaves and access drains. In garages and basements, concentrate application along walls and baseboards. In new construction, apply in wall voids and other areas where insects may hide. Concentrate application in areas where insect activity is greatest. Go Green Doktor Doom Granular Bait D may be placed in removable trays in areas accessible to insects but away from children and pets. Always record the location and number of bait stations. Reapply as necessary.

Crack and crevice treatment: Apply in inaccessible areas such as cracks and crevices where insects may hide. Crack and crevice applications may be made using most types of dust applicators. A bellows type duster or Nisus Corporation's Snuffer applicator works best. Insert stem into gaps, cracks and crevices and apply 2 to 6 puffs per 0.3 linear metre, depending upon the severity of the infestation. Apply Go Green Doktor Doom Granular Bait D under and behind refrigerators and other appliances, sinks, counters; into openings around drains, water pipes and electrical conduits; and in cracks and crevices along baseboards and corners of cabinets, cupboards and closets. Remove all lower drawers in kitchen and bathroom cabinets, bedroom dressers and chest of drawers, and then carefully apply Go Green Doktor Doom Granular Bait D in drawer wells. Apply only in areas inaccessible to children and pets. Avoid contamination of feed and foodstuffs, utensils and food preparation areas. Any bait visible after application must be brushed into cracks and crevices or removed. Reapply as necessary.

Application in kitchens: Apply as a crack and crevice treatment only. Cover or remove food commodities, food processing equipment, packaging materials and utensils before application. Thoroughly clean all surfaces that may contact food and rinse with potable water before reuse.

PRECAUTIONS:

KEEP OUT OF REACH OF CHILDREN AND PETS. Harmful if swallowed. Avoid contact with eyes, skin or clothing. Wash hands after use. The use of protective gloves, eye wear and dust mask is recommended during the application of this product.

FIRST AID:

IF Swallowed: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

If On SKIN or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice.

If In Eyes: Hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to mouth, if possible. Call a poison control centre or doctor for further treatment advice.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically.

STORAGE:

Store bait in original, tightly sealed container. Store in a cool, dry place away from children and pets.

DISPOSAL:

Do not reuse empty container. Wrap and dispose of the empty container in household garbage.
