SPA LIFE BROMINATING PUCKS, when used as directed, are effective as a spa water sanitizer.

WARNING: Direct puck contact may cause bleaching of vinyl, synthetic or painted spa surfaces. Automatic feeding devices employing these pucks must be totally free from traces of other spa sanitizers to avoid the probability of an explosion.

PRECAUTIONS:

KEEP OUT OF THE REACH OF CHILDREN. Potential skin sensitizer. Dangerous gas formed when mixed with acid. Do not mix with any other chemical. Strong oxidizing agent. May cause fire or explosion if contaminated. Corrosive. Corrosive to eyes and skin. Causes eye damage and skin burns. Skin exposure to dust may cause allergic skin reaction in some individuals. Dust may be harmful or fatal if inhaled. Harmful or fatal if swallowed. Do not get in eyes, skin or clothing. It is recommended to wear rubber gloves and goggles when handling the product. Do not swallow. Do not breathe dust. Keep container closed and store in a cool, dry location.

DISPOSAL: Rinse container thoroughly before discarding. Do not re-use empty container. Offer for recycling if available, or dispose in accordance with local and provincial regulations. For information on disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.

FIRST AID:

IF SWALLOWED: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Probable mucosal damage may contraindicate the use of gastric lavage. Treat symptomatically.

DIRECTIONS FOR USE:

Weight per puck 20 g :

NOTE: Check expiry date of the test kit as test results may be inaccurate if used after that date.

1) Maintain recommended daily levels as determined by testing kit.

Free available bromine: 3.0 - 5.0 ppm.

pH: 7.2- 7.8.

Total Alkalinity: 100- 150 ppm.

Calcium Hardness: 100 - 200 ppm.

2) If using an automatic feeding device, fill the chamber(s) with pucks and adjust flow rate, according to manufacturer's recommendations, to maintain proper bromine residual. Adding pucks to the spa's skimmer basket is an alternative bromine feed method. Daily usage should approximate 5 g SPA LIFE BROMINATING PUCKS per 1,000 L of spa water. **NOTE:** Heavy spa usage, and higher temperatures may require higher usage rates to maintain proper bromine residuals.

3) Periodic super-chlorination of spa water is recommended. Follow label instructions of super-chlorination product being employed. **NOTE:** Persistent foam formation, turbid, or malodorous waters are indicators of inadequate sanitizer levels. To correct such conditions, super-chlorinate spa water by adding super-chlorination product. Maintain circulation at least 30 minutes and wait 4 hours before using. For proper sanitation, spa must be completely drained periodically. The number of days between COMPLETE SPA DRAINAGE is equal to the volume of spa water in litres, divided by 10 times the maximum number of daily spa users. Refill the spa with water and repeat DIRECTIONS FOR USE. Maximum spa water usage temperature is 40°C. Duration in spa water at 40°C should not exceed 15 minutes.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not discharge into lakes, streams, ponds, or public waters.

DO NOT contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes.
