NET CONTENTS: Bulk

DIRECTIONS FOR USE

To be used only in the manufacture of a plant growth regulator which is registered under the *Pest Control Products Act*.

PRECAUTIONS

PREVENT ACCESS BY UNAUTHORIZED PERSONNEL.

Avoid formation of dust clouds in air which are highly sensitive to ignition by small heat sources, such as electrostatic sparks.

Avoid ingestion, contact with skin and eyes and inhalation of airborne dust.

During plant operation and decontamination of spills, the following minimum protective clothing should be worn: cap, safety goggles, PVC or nitrile rubber gloves, coveralls, rubber boots and a dust respirator.

FIRST AID

IF SWALLOWED: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

IF ON SKIN/CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.

GENERAL: Never give anything by mouth to an unconscious person. Remove person to a safe and uncontaminated area. Seek medical attention immediately if irritation persists or is severe. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION

Provide symptomatic and supportive therapy as indicated; no specific antidote available. Following ingestion, adsorbents such as activated charcoal may be of value. For large quantities, gastric lavage or emesis may be effective if performed within 4 hours of ingestion. However, the need for gastric lavage should be considered carefully, in view of the low acute oral toxicity of this material: it may be better to observe the patient and employ general supportive measures only. If gastric lavage is considered necessary, then inhalation of gastric contents must be prevented (particularly with any non-routine oil-based materials).

STORAGE

Store in sealed containers in a secure, dry, ventilated area away from direct sunlight and sources of heat and ignition.

DISPOSAL AND DECONTAMINATION

Wear protective clothing and eye goggles (as described under PRECAUTIONS) to prevent skin and eye contact. Sweep up the powder, being careful not to create a dust. Place sweepings in a metal pail for small spills and a metal drum for large spills. To clean up residual, cover the area with a floor sweeping product and sweep up into an open drum. Repeat if necessary. Seal pails or drums and dispose of contaminated materials in accordance with municipal or provincial recommendations.

Canadian formulators using this product should dispose of unwanted active ingredient and containers in accordance with municipal or provincial regulations. For additional details and information on clean up of spills, contact the provincial regulatory agency and the manufacturer.

NOTICE TO USER

This pest control product is to be used only in accordance with the directions on the label. It is an offence under the *Pest Control Products Act* to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.
