Soft Soak Brominating Granules

SANITIZER

Controls bacteria and algae in spa and hot tub water.

Low odour
Ideal in hot water
Restores water clarity
Concentrated formula

ACTIVE INGREDIENTS:

Available Chlorine present as Sodium Dichloro-s-Triazinetrione 52.7%
Sodium Bromide 14.7%

DOMESTIC

CAUTION

POISON

CORROSIVE

REG. NO. 31109P.C.P. ACT

READ THE LABEL BEFORE USING

KEEP OUT OF REACH OF CHILDREN

NET CONTENTS: XXX g

2. The filtration system should be maintained in order to ensure proper disinfection.
3. Apply 6 g (approx. ½ tablespoon) of ***Soft Soak Brominating Granules*** per 1000 L directly to bather-free spa water with circulation system operating. Test for available bromine and repeat above dosage at 15 - 20 minute intervals until a residual of 3.0 - 5.0 ppm is reached.
4. Periodic superchlorination of spa water is recommended after heavy use or, once a week, in moderately used spas to remove organic waste. Apply 25 g (approx. 2 tablespoons) of ***Soft Soak Brominating Granules*** per 1000 L of water as often as required. Bathers should not use spa until residual reading drops to 6.0ppm.
5. Persistent foam formation, turbid, or malodorous water are indicators of inadequate sanitizer levels. To correct such conditions, superoxidize spa water by adding 25 g (approx. 2 tablespoons) of ***Soft Soak Brominating Granules*** per 1000 L of spawater. Maintain circulation at least 30 minutes and wait 4 hours before using. ***Soft Soak Brominating Granules*** contains stabilizer (cyanuric acid) which will accumulate in spa water. Keep stabilizer within 30 - 100 ppm range by dilution with fresh water.
6. For proper sanitation, spa must be completely drained periodically. The number of days between COMPLETE SPA DRAINAGE is equal to the volume of spa water in litres, divided by 10 times the maximum number of daily spa users. Refill spa with water and repeat DIRECTIONS FOR USE.
7. Maximum spa water usage temperature is 40°C. Duration in spa water, at 40°C, should not exceed 15 minutes.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN.

Dangerous gas formed when mixed with acid. Do not mix with any other chemical. Strong oxidizing agent. May cause fire or explosion if contaminated. Avoid contact with skin and eyes. It is recommended to wear rubber gloves when handling this product. Avoid breathing dust. Harmful if swallowed. Keep container closed and store in a cool, dry location.

Do not use this product with an electrolysis device (for example, a chlorine generator).
Do not use this product with ozonation. Do not use this product with ultraviolet (UV).

FIRST AID: If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. **If on skin or clothing:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice. **If swallowed:** Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. **If inhaled:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.
