DESCRIPTION:

HTH® Spa Brominating Tablets is a form of brominating disinfectant for spas and hot tubs. It is easily adapted to many erosion feeders used to automatically treat residential swimming spas and hot tubs. When used as directed, this product will disinfect spas and hot tubs water, keeping it clear and free of odour. This product gives the effectiveness of chlorine without the chlorine odour. For proper sanitation, spa and hot tub must be completely drained periodically.

DIRECTIONS FOR USE:

The number of days between COMPLETE SPA DRAINAGE is equal to the volume of spa water in litres, divided by 10 times the maximum number of daily spa users. Refill spa with water and repeat DIRECTIONS FOR USE.

Maximum spa water usage temperature is 40 deg C. Duration in spa water at 40 deg C should not exceed 15 minutes. NOTE: Automatic feeding devices employing these tablets must be totally free from traces of other pool sanitizers to avoid the probability of fire and explosion.

To start up a new spa or hot tub or one recently drained, clean all surfaces, backflush or clean the filter, chemically balance the calcium hardness (150-200 ppm) and total alkalinity (100-120 ppm), treat for iron, copper and manganese if present and adjust the pH to 7.2 - 7.8 prior to initiating treatment with this product. Place this product in a suitable feeder, adjust feeder according to manufacturer's directions to maintain an active bromine level of 3-5 ppm in residential spas and hot tubs. Use a reliable test kit for free bromine measurements. **Superoxidation:** Water soluble, non-filterable wastes can accumulate in spa or hot tub water and cause dull or cloudy water and can stimulate algal growth. Superoxidation or superchlorination with a suitable oxidizing shock treatment should be done on a regular basis to remove these wastes and maintain clear, sparkling water. Suitable oxidizing agents are those based on calcium hypochlorite, lithium hypochlorite, sodium hypochlorite or potassium peroxydisulfate.

DO NOT contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes.

PRECAUTIONS:

KEEP OUT OF REACH OF CHILDREN. POTENTIAL SKIN SENSITIZER. POISONOUS OR FATAL IF SWALLOWED OR INHALED. CORROSIVE TO EYES AND SKIN. Causes irreversible eye and skin damage. Irritating to nose and throat. Do not inhale dust. Use with adequate ventilation. Do not get into eyes, on skin or clothing. It is recommended to wear rubber gloves and goggles when handling the product. Do not eat, drink or smoke when handling. Wash thoroughly after handling. Immediately remove contaminated clothing and wash before reuse.

FIRST AID:

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. **IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice. **IF INHALED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice. **IF SWALLOWED:** Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION:

Probable mucosal damage may contraindicate the use of gastric lavage. Treat symptomatically.

ENVIRONMENTAL HAZARDS:

This product is toxic to fish. Do not discharge into lakes, streams, ponds or public waters.

PHYSICAL AND CHEMICAL HAZARDS:

Strong oxidizing agent. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire and explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with fire and explosion. In case of contamination or decomposition do not reseal container. If possible, isolate container in open air or well ventilated area, if necessary flood with large volumes of water.

STORAGE:

Keep product dry in closed container when not in use. Store in a cool dry, well-ventilated area away from heat, open flames and other chemicals.

DISPOSAL:

Rinse empty container thoroughly before discarding. Do not re-use empty container. Offer for recycling if available, or dispose in accordance with local and provincial regulations. For information on the disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.
