REDUCES THE CONCENTRATION OF CHLORINE AND OTHER CHEMICAL PRODUCTS

CONTROLS ALGAE, STABILIZES THE PH AND CLARIFIES WATER

CAUTION

POISON READ THE LABEL BEFORE USING KEEP OUT OF REACH OF CHILDREN

DOMESTIC

REGISTRATION NO.: 27716 PEST CONTROL PRODUCTS ACT

GUARANTEE:

• <u>COPPER SULFATE PENTAHYDRATE</u>: 16% (COPPER AS A METAL: 4%)

WARNING

Contains Copper: Copper salt deposits may stain pool surfaces. Excessive levels of Copper and rapid changes in pH may increase this probability. Do not use products of unknown origin or which do not bear a registration number

NET CONTENTS: 2 kg (soluble powder)

RUDBECOM INC. 67014, C.P. Lemoyne, St-Lambert Québec, Canada, J4R 2T8 <u>www.crystalplus.ca</u> TEL : 248 747 7014

(SECONDARY POSTING AREA)

PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN.

Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Harmful if swallowed.

DO NOT allow adults. Children or pets to enter the treated area until dusts have settled.

CHEMICAL HAZARDS

Do not mix with any chemical other than water. Any other contamination may cause a chemical reaction, resulting in noxious fumes and heat.

ENVIRONMENTAL HAZARDS

TOXIC to aquatic organisms. Do not dispose of container and/or contents in lakes, rivers or streams.

DISPOSAL

Do not re-use empty container. Wrap and dispose of empty container with household garbage. For information on disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of spill, and for clean-up of spills.

FIRST AID:

Contact with skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice. Hold eye open and rinse slowly and gently with water for 15–20 minutes

Contact with eyes: Hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

If product is swallowed: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. Take container, label or product name and Pest Control product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION Treat symptomatically.

NOTICE TO USER:

This control product is to be used only in accordance with the directions on this label. It is an offence under the *Pest Control Products Act* to use a control product under unsafe conditions.

TOXICOLOGICAL INFORMATION Treat symptomatically.

NOTICE TO USER:

This pest control product is to be used only in accordance with the directions on the label. It is an offence under the Pest Control Products Act to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.

DIRECTIONS FOR USE

DO NOT contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes.

DO NOT apply this product in a way that will result in direct contact with adults, children or pets, either directly or through drift. Avoid application of this product when winds are gusty.

Trévi bleu is a mild easy-to-use product. It will help increase your pleasure and comfort when you use your pool. You will also save on the maintenance costs by reducing the volume of chlorine used as well as all other chemical maintenance products. *Trévi bleu* may be used from the start of the season or after the season has started and is harmless even in the presence of high concentrations of chlorine or bromine.

Trévi bleu will allow you to keep your pool water clean and clear all season long. Using recommended quantities will also help stabilise the pH in your pool water and will prevent the growth of algae.

- <u>When the season starts</u>: According to the quality of your pool water, superchlorinating may be necessary. Use calcium hypochlorite (standard granular chlorine).
 Follow chlorine manufacturer's instructions and refer to the table below for instructions on how to use *Trévi bleu*
- <u>All season long</u>, use *Trévi bleu* weekly after your backwash.(see table on the container for quantities). Make sure that minimum residual chlorine concentration in your pool remains at all time between 0.8 – 1.0 PPM. This level of chlorine in pool water prevents the growth of bacteria.
- In cases of excessive rain, when the temperature is very hot, or after intensive use of your pool: Adding chlorine may be necessary to maintain the minimum residual chlorine concentration in your pool You do not need to add more *Trévi bleu*

WEEKLY CONCENTRATION REQUIRED:

20 GRAMS PER 10,000 LITRES OF WATER

Trévi bleu may be poured directly into the skimmer after a backwash has been performed.

For easy calculations of quantities required, refer to the table below: "ml = gram" on the measuring cup provided with the product

ABOVEGROUND POOLS

4,6 m (15')	20,000 litres	(4,400 gallons)	40 grams per week
5,5 m (18')	28,600 litres	(6,300 gallons)	60 grams per week
6,4 m (21')	39,000 litres	(8,600 gallons)	80 grams per week
7,3 m (24')	51,800 litres	(11,200 gallons)	100 grams per week
8,2 m (27')	64,800 litres	(14,200 gallons)	130 grams per week

IN-GROUND POOLS

4,6m x 9,1m (15' x 30') 63,800 litres	(14,000 gallons) 120 grams per week
4.9m x 9,8m (16' x 32') 72,500 litres	(16,000 gallons) 150 grams per week
5,5m x 11m (18' x 36') 92,000 litres	(20,000 gallons) 180 grams per week

Measure and maintain the recommended residual chlorine, pH, total alkalinity and calcium hardness using an adequate test kit
