REG. NO. 30618 P.C.P. ACT

GUARANTEE: d-cis trans Allethrin ...0.25%

Net Contents: 5 sticks / 180g

Secondary (Back) Panel-English

DIRECTIONS FOR USE: For best results, do not use in wind. Areas such as backyards, patios, decks, etc. which are protected or sheltered from wind are more easily protected by this product. In light winds, place sticks upwind where possible to make use of associated drift. Remove a stick from the box and ignite the tip until it flames. Invert the stick to insure the entire end is well started. When this occurs, blow out the flame. It will continue to burn without a flame but will create smoke which will repel mosquitos. Insert the bottom end of the stick into the ground so that the stick stands upright. Use one stick per 28 cubic meters (1000 cubic feet) of confined space. To extinguish, gently knock off glowing end and put the tip out by inserting in dirt or sand.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Cover exposed food. Avoid prolonged inhalation of smoke. Do not touch lit end. Do not place on flammable surfaces. After using, wash hands with soap and water.

FIRST AID: If contact with stick on skin or clothing, take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice. If ingested, call a poison control centre or doctor immediately for treatment advice. Have a person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. Take container, label or product name and PCP Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically.

STORAGE AND DISPOSAL: Store in a cool, dry place in original container. Wrap empty container and sticks, and dispose with household garbage.
