Raid kills bugs dead!®

Kills bugs dead!®

Raid Defence System

Helps you work smarter, not harder, to fight bugs.

Visit raid.ca to identify your bug and best treatment plan.

Tips:

Sweep behind washers and dryers often and rearrange furniture periodically to avoid spiders spinning webs in the same location.

Keep clothing, shoes and blankets off the floor so that spiders do not hide in them during the day.

Use yellow light bulbs outdoors to attract fewer insects, thereby discouraging spiders from spinning webs near your house.

Use this product to: Kill (bugs) on Contact:

Use (Raid® Spider Blaster Bug Killer 4) (this product) (indoors) to kill spiders (in the nest) on contact.

Formula Claims (Logo)

Water Based (Formula) [graphic may also be used]

Low Odor
No Lingering Chemical Odor
No Lingering Odor
No Lasting Odor
No Lasting Chemical Odor
Leaves no odor
Leaves no chemical odor
Keeps on killing for up to 10 days

Kills on contact. Raid® Spider Blaster Bug Killer 4 kills ants, cockroaches, earwigs, spiders, multi-coloured Asian ladybird beetles, centipedes, silverfish and crickets when applied directly to the pest. It also keeps on killing ants, cockroaches, earwigs, spiders and crickets with long-lasting action after you spray for up to 10 days.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. May irritate skin. Avoid contact with skin. Wash hands after use. Do not use on humans, pets or foodstuffs. Remove or cover exposed food and drinking water before application. Remove or cover dishes, utensils, food processing equipment and food preparation surfaces, or wash them before use. Remove pets, birds and cover fish aquariums before spraying. Bystanders must NOT be present during the application of this product. Do not allow adults, children or pets to enter the treated area until sprays have dried.

CONTENTS UNDER PRESSURE. Do not place container in hot water or near radiators, stoves or other sources of heat. Do not puncture or incinerate container or store at temperatures over 50°C. Keep away from open flame or spark.

FIRST AID: If swallowed: Call a poison control centre or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give **any** liquid to the person. Do not give anything by mouth to an unconscious person. **If on skin or clothing:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice. **If inhaled:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice. **If in eye:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION:

This product contains petroleum distillates. Vomiting may cause aspiration pneumonia.

Skin exposure may cause transient sensations (tingling, burning, itching, numbness). Other symptoms of exposure could include respiratory effects (such as cough, sore throat, or shortness of breath), nausea, dizziness. Treat symptomatically

ENVIRONMENTAL PRECAUTIONS

- Toxic to bees
- Toxic to aquatic organisms

- Toxic to small wild mammals

DISPOSAL:

DO NOT reuse the empty containers. Dispose in household garbage. Unused or partially used products should be disposed at provincially or municipally designated hazardous waste disposal sites.

DIRECTIONS FOR USE:

Kills ants, cockroaches, earwigs, spiders, multi-coloured Asian ladybird beetles, centipedes, silverfish and crickets.

SHAKE WELL BEFORE EACH USE. Hold container upright. Do not spray up into the air. Point spray opening toward area to be sprayed and press button firmly. Hold about 30 cm from area being sprayed. Spray until surfaces are wet. Avoid excessive wetting of asphalt, tile, rubber and plastic materials as staining may occur. It is recommended to check for potential staining and damage by spraying a small, inconspicuous area and examining the treated area after it has dried before treating an entire area.

Spray inside house as a spot treatment directly to pests or to areas where the listed pests may enter or hide, such as door sills, baseboards, window frames, cracks and crevices in and walls, surfaces around pipes, behind and beneath cabinets, refrigerators, sinks, stoves etc. Retreat every 10 days if pests continue to be a problem.

Apply ONLY as a spot treatment.

Spot treatment: Spot application is localized to a surface area not more than 0.2m². Spots are not to be adjoining. The combined area of spots is not to exceed 10% of the total surface area of a room.

DO NOT apply as a broadcast treatment.

DO NOT apply as a space spray.

DO NOT apply as an indoor perimeter treatment.

DO NOT apply any product containing cyfluthrin more than once every 10 days.

DO NOT apply to surfaces that may come into contact with food/feed. Ventilate treated areas after application by opening windows and doors. Use fans where required to aid in the circulation of air. If you experience respiratory effects (such as cough, sore throat, or shortness of breath), nausea, dizziness, or eye irritation upon re-entering areas treated with any product containing cyfluthrin, ventilate the area more and vacate the premises. If you continue to experience effects after additional ventilation, contact your health care professional.

DO NOT allow adults, children or pets to enter the treated area until sprays have dried.
