SELECTIVE HERBICIDE:

Controls weeds in lawns: Dandelion*, Ragweed, Ground Ivy (creeping Charlie), White Clover, and Poison Ivy**.

DESCRIPTION:

A.D.I.O.S.™ Ready to Use Weed Killer is an odorless, post-emergent foliar treatment that rapidly desiccates the target weed. When applied according to label directions, **A.D.I.O.S.™** Ready to Use Weed Killer travels through the foliage, stems and root system. Visible signs of control may be seen within 24 hours after application due to rapid loss of water from plant cells.

DIRECTIONS FOR USE:

SHAKE WELL BEFORE USING.

Spray weeds using a coarse nozzle setting to reduce drift until foliage, crown and stems are thoroughly wetted to the point of runoff.

Best results are obtained when applied prior to flowering and while plants are still small. Smaller plants are less likely to experience re-growth. Some mature weeds may require a second application.

*** DANDELION CONTROL:**

To ensure dandelion root kill, make sure that the solution accumulates [pools] in the center of the crown as well as covers the leaves. For lawns, best results occur when applied shortly after mowing. Depending on the age and size, a second application may be needed to control dandelion. Spot treatment is highly recommended for optimal results.

**** POISON IVY CONTROL:**

To ensure root kill, repeated applications (3 to 4 weeks apart) may be needed to control poison ivy. Application may need to be repeated the following year.

CONDITIONS:

For optimum control, apply **A.D.I.O.S.™** Ready to Use Weed Killer under sunny conditions when ambient temperature is at least 24°C. Some re-growth may occur following application made under less than favourable conditions such as cloudy or shady conditions, or when temperature is below 24°C. Do not apply when rain is forecast within the next hours.

Avoid use in sunny conditions when temperature exceeds 31°C or when winds are gusty. Foliage that is accidentally sprayed may be affected. Some other species including grasses and broadleaved plants may be affected. Do not apply on or near desirable plants such as vegetables or ornamental plants. If desired plants are contacted, rinse them off immediately with water.

PRECAUTIONS:

KEEP OUT OF REACH OF CHILDREN

May cause eye and skin irritation. Avoid contact with skin, eyes and clothing. Avoid ingestion and inhalation. Wash hands after handling and before meals.

FIRST AID:

If swallowed: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION:

Treat symptomatically.

ENVIRONMENTAL HAZARDS:

May be harmful to freshwater aquatic species and to plants that are not saline tolerant.

DISPOSAL:

Do not reuse empty container. Wrap and dispose of empty container with household garbage.

NOTICE TO USER:

This pest control product is to be used only in accordance with the directions on the label. It is an offence under the *Pest Control Products Act* to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.
