ThermaCELL® MOSQUITO AREA REPELLENT

Camping lantern

KEEP OUT OF REACH OF CHILDREN

CAUTION - HOT SURFACE

For outdoor use only to kill and repel mosquitoes. Do not use indoors, in a tent or any enclosed area. Do not touch the grill while the lantern is in use. Grill is hot while in use. Place on a flat, stable surface with the grill facing upward. Do not cover with any material while in use. Do not contaminate food/feed by storage. Lantern contains flammable butane. Do not use near fire or flame. Read *Directions* and *Precautions* prior to use. Butane cartridges other than ThermaCELL® will not work in this lantern. Seller will not be held responsible for damage, injury or poor performance caused by use of other butane cartridges or repellent mats.

DIRECTIONS: Alleviates the annoyance from mosquitoes by repelling and killing mosquitoes and reducing the number of bites in an area up to 4.5 metres from the product (as large as an average-size deck or patio) for up to four hours. Effect is **not** immediate. For best results, allow 30 minutes for product to take effect. This product works well in outdoor areas where there is minimal air movement, such as decks, porches, patios and yards. Use one lantern per each 21.0 square metres (an area 4.5 x 4.5 metres or 15' x 15'). Use more lanterns in larger areas, spacing them to ensure adequate coverage. Wind, heat or humidity may affect the performance of this product. Lantern and mat effectiveness may be diminished if exposed to rain. Automatic shut-off switch if lantern tips or is lifted. Lantern provides light as it repels and kills mosquitoes. Simply turn lantern on, push the button and enjoy the outdoors for up to 4 hours per mat.

1. Remove the battery cover [on the bottom], Install {number} {size} size batteries (included) ([not included]), [making sure that the batteries are correctly placed in the indicated directions]. Replace battery cover. The batteries will provide lamp light for up to {number} hours; [{number} hours on the 'LOW' setting and {number} hours on the 'HIGH' setting]. [Replacement alkaline batteries will provide lamp light for up to {number} hours; {number} hours on the 'LOW' setting and {number} hours on the 'HIGH' setting]
2. Remove one ThermaCELL mat from wrapper. Mats last up to 4 hours. Mat turns from pale blue to white when repellent has been exhausted.
3. Make sure the 'ON/OFF' button is in the 'OFF' position. Insert the mat under the grill at the top of the lamp.
4. Remove lamp globe [shade] [globe and top of lamp] from base [stand] by {choose from one of the following}:
 - a. Twisting the globe [shade] clockwise [counterclockwise]
 - b. Unscrewing the globe [shade] clockwise [counterclockwise]
 - c. Releasing [squeezing] [pushing] [turning] the latch [tabs] and removing [lifting out] the lamp [globe] [shade] [and cap] [top of lamp] until it is fully removed [from the base]
 - d. Holding down the base and removing [lifting out] [lifting up] the top of the lamp [until it is fully removed [from the base]
5. Remove the butane cartridge cap. Insert [screw] the cartridge into the [center of the] lamp [globe] [shade]. Make sure the cartridge is fully inserted by turning it clockwise [counterclockwise] until it stops. Replace lamp [globe] [shade] on base [stand]. One ThermaCELL butane cartridge lasts up to 12hours.
6. To turn on [activate] lamp light, push the 'light' ['black'] button located on the bottom of the [base of the] lamp [base] [stand]. Push the button once for low light, twice for high light, and three times to turn off the light. [Push the switch to 'LOW' for low light, 'HIGH' for high light and 'OFF' to turn off the light.] The lamp may be used as a mosquito repellent with or without the light being on. [However,] for the lamp to repel mosquitoes the mosquito repellent must be activated. If lamp light does not turn on, replace batteries.
7. To turn on [activate] the mosquito repellent push the 'ON/OFF' button to the 'ON' position. The gas will begin to flow.
8. Wait approximately 5 to 10 seconds and then depress the start button three to five times in rapid succession.
9. To verify that the mosquito repellent is activated [working] [operating] check [look at] the circular [view hole] [lens] located on [at] the top [base] [bottom] of the lamp. An orange light will glow. If there is no orange light, check to make sure the lamp is 'ON' and the cartridge is completely screwed into place. Also check the fuel level in the cartridge. If the fuel level in the cartridge is empty [or near empty], remove [empty] cartridge and replace with a new ThermaCELL cartridge. Then once again turn the lamp 'ON' and depress the start button three to five times in rapid succession. Check again to make sure the orange light is glowing.
10. Place the lamp on a flat stable area with the lamp grill facing up. Do not touch the grill; it will be hot after a few minutes. Some visible vapour will appear during use. This is normal and no cause for concern. When finished using the lamp, turn [slide] [flip] the 'ON/OFF' button to the 'OFF' position. If using the light, turn [push] the 'light' ['black'] button to "OFF" [to extinguish the lamp light]. Allow lamp to cool completely. Lamp is now ready for storage.
11. To replace a used mat, turn off lamp and allow to cool completely. Push the used mat out by inserting a fresh mat.
12. [To hang the lamp from a pole [hook] (not included), attach lamp bail [hanger] to top of lamp.]

One ThermaCELL butane cartridge lasts up to 12 hours. If your appliance fails to heat, it may be out of fuel. Check the fuel level by holding the cartridge vertically and looking at the fuel level. You can see the amount of butane in the cartridge. Replace if empty.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN AND PETS. Harmful if inhaled. Avoid breathing vapours. For outdoor use only to kill and repel mosquitoes. Do not use indoors, in tents or any enclosed area. Do not touch the grill while the appliance is in use. The grill is hot while in use. Do not insert anything other than the mat into the appliance [grill]. Place appliance on a flat, stable surface with the grill facing upward. Do not cover with any material while in use. Clean with a damp cloth only when the device is cool and inactive. Store unused mats in the original packaging in a cool, dry place inaccessible to children and pets. Store appliance and butane cartridges in a cool, dry place away from sources of heat. Harmful or fatal if swallowed. May be harmful if absorbed through skin. Avoid contact with skin and clothing. Wash hands with soap and water after use. Cover exposed food.

Cartridge contains flammable butane. Do not use near sparks or open flames. Do not allow mat to come into contact with other substances. Cartridges contain pressurized butane. Protect the butane cartridges from sunlight. Do not expose them to temperatures above 50°C (120°F). Do not pierce, break or incinerate butane cartridges, even after use. Butane cartridges other than ThermaCELL® cartridges will not work in this appliance. Seller will not be held responsible for

damage, injury or poor performance caused by use of other butane cartridges or repellent mats.

This pesticide is highly toxic to fish. Do not apply directly to water. Drift from treated areas may be hazardous to organisms in adjacent aquatic sites.

FIRST AID: If Inhaled, move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice. If swallowed, call a poison control centre or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give **any** liquid to the person. Do not give anything by mouth to an unconscious person. If on skin or clothing, take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice. If in eyes, hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Contains petroleum distillates. Treat symptomatically.

STORAGE: DO NOT contaminate food/feed by storage.

DISPOSAL: Do not reuse empty envelopes. Wrap used mats and butane cartridges and place in household trash. Do not incinerate cartridges. Unused or partially used products should be disposed at provincially or municipally designated hazardous waste disposal sites.

NOTICE TO USER: This pest control product is to be used only in accordance with the directions on the label. It is an offence under the Pest Control Products Act to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.

ThermaCELL Mosquito Area Repellent Camping lantern: CANADA MR-9CL (CA)

DIRECTIONS: Alleviates the annoyance from mosquitoes by repelling and killing mosquitoes and reducing the number of bites in an area up to 4.5 metres from the product (as large as an average-size deck or patio) for up to four hours. Effect is **not** immediate. For best results, allow 30 minutes for product to take effect. This product works well in outdoor areas where there is minimal air movement, such as decks, porches, patios and yards. Use one lantern per each 21.0 square metres (an area 4.5 x 4.5 metres or 15' x 15'). Use more lanterns in larger areas, spacing them to ensure adequate coverage. Wind, heat or humidity may affect the performance of this product. Lantern and mat effectiveness may be diminished if exposed to rain. Automatic shut-off switch if lantern tips or is lifted. Lantern provides light as it repels and kills mosquitoes. Simply turn lantern on, push the button and enjoy the outdoors for up to 4 hours per mat.

1. Remove the battery cover [on the bottom], Install {number} {size} size batteries (included) ([not included]), [making sure that the batteries are correctly placed in the indicated directions]. Replace battery cover. The batteries will provide lamp light for up to {number} hours; [{number} hours on the 'LOW' setting and {number} hours on the 'HIGH' setting]. [Replacement alkaline batteries will provide lamp light for up to {number} hours; {number} hours on the 'LOW' setting and {number} hours on the 'HIGH' setting]
2. Remove one ThermaCELL mat from wrapper. Mats last up to 4 hours. Mat turns from pale blue to white when repellent has been exhausted.
3. Make sure the 'ON/OFF' button is in the 'OFF' position. Insert the mat under the grill at the top of the lamp.
4. Remove lamp globe [shade] [globe and top of lamp] from base [stand] by {choose from one of the following}:
 - a. Twisting the globe [shade] clockwise [counterclockwise]
 - b. Unscrewing the globe [shade] clockwise [counterclockwise]
 - c. Releasing [squeezing] [pushing] [turning] the latch [tabs] and removing [lifting out] the lamp [globe] [shade] [and cap] [top of lamp] until it is fully removed [from the base]
 - d. Holding down the base and removing [lifting out] [lifting up] the top of the lamp [until it is fully removed [from the base]
5. Remove the butane cartridge cap. Insert [screw] the cartridge into the [center of the] lamp [globe] [shade]. Make sure the cartridge is fully inserted by turning it clockwise [counterclockwise] until it stops. Replace lamp [globe] [shade] on base [stand]. One ThermaCELL butane cartridge lasts up to 12hours.
6. To turn on [activate] lamp light, push the 'light' ['black'] button located on the bottom of the [base of the] lamp [base] [stand]. Push the button once for low light, twice for high light, and three times to turn off the light. [Push the switch to 'LOW' for low light, 'HIGH' for high light and 'OFF' to turn off the light.] The lamp may be used as a mosquito repellent with or without the light being on. [However,] for the lamp to repel mosquitoes the mosquito repellent must be activated. If lamp light does not turn on, replace batteries.
7. To turn on [activate] the mosquito repellent push the 'ON/OFF' button to the 'ON' position. The gas will begin to flow.
8. Wait approximately 5 to 10 seconds and then depress the start button three to five times in rapid succession.
9. To verify that the mosquito repellent is activated [working] [operating] check [look at] the circular [view hole] [lens] located on [at] the top [base] [bottom] of the lamp. An orange light will glow. If there is no orange light, check to make sure the lamp is 'ON' and the cartridge is completely screwed into place. Also check the fuel level in the cartridge. If the fuel level in the cartridge is empty [or near empty], remove [empty] cartridge and replace with a new ThermaCELL cartridge. Then once again turn the lamp 'ON' and depress the start button three to five times in rapid succession. Check again to make sure the orange light is glowing.
10. Place the lamp on a flat stable area with the lamp grill facing up. Do not touch the grill; it will be hot after a few minutes. Some visible vapour will appear during use. This is normal and no cause for concern. When finished using the lamp, turn [slide] [flip] the 'ON/OFF' button to the 'OFF' position. If using the light, turn [push] the 'light' ['black'] button to "OFF" [to extinguish the lamp light]. Allow lamp to cool completely. Lamp is now ready for storage.
11. To replace a used mat, turn off lamp and allow to cool completely. Push the used mat out by inserting a fresh mat.
12. [To hang the lamp from a pole [hook] (not included), attach lamp bail [hanger] to top of lamp.]

One ThermaCELL butane cartridge lasts up to 12 hours. If your appliance fails to heat, it may be out of fuel. Check the fuel level by holding the cartridge vertically and looking at the fuel level. You can see the amount of butane in the cartridge. Replace if empty.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN AND PETS. Harmful if inhaled. Avoid breathing vapours. For outdoor use only to kill and repel mosquitoes. Do not use indoors, in tents or any enclosed area. Do not touch the grill while the appliance is in use. The grill is hot while in use. Do not insert anything other than the mat into the appliance [grill]. Place appliance on a flat, stable surface with the grill facing upward. Do not cover with any material while in use. Clean with a damp cloth only when the device is cool and inactive. Store unused mats in the original packaging in a cool, dry place inaccessible to children and pets. Store appliance and butane cartridges in a cool, dry place away from sources of heat. Harmful or fatal if swallowed. May be harmful if absorbed through skin. Avoid contact with skin and clothing. Wash hands with soap and water after use. Cover exposed food.

Cartridge contains flammable butane. Do not use near sparks or open flames. Do not allow mat to come into contact with other substances. Cartridges contain pressurized butane. Protect the butane cartridges from sunlight. Do not expose them to temperatures above 50°C (120°F). Do not pierce, break or incinerate butane cartridges, even after use. Butane cartridges other than ThermaCELL® cartridges will not work in this appliance. Seller will not be held responsible for damage, injury or poor performance caused by use of

ThermaCELL Mosquito Area Repellent Camping lantern: CANADA MR-9CL (CA)

other butane cartridges or repellent mats.

This pesticide is highly toxic to fish. Do not apply directly to water. Drift from treated areas may be hazardous to organisms in adjacent aquatic sites.

FIRST AID: If Inhaled, move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice. If swallowed, call a poison control centre or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give **any** liquid to the person. Do not give anything by mouth to an unconscious person. If on skin or clothing, take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice. If in eyes, hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Contains petroleum distillates. Treat symptomatically.

STORAGE: DO NOT contaminate food/feed by storage.

DISPOSAL: Do not reuse empty envelopes. Wrap used mats and butane cartridges and place in household trash. Do not incinerate cartridges. Unused or partially used products should be disposed at provincially or municipally designated hazardous waste disposal sites.

NOTICE TO USER: This pest control product is to be used only in accordance with the directions on the label. It is an offence under the Pest Control Products Act to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.
