HTH® Super Chlorinating Granules

DOMESTIC

Kills bacteria and prevents algae growth Sanitizes pool water
Routine chlorinator
Controls algae and promotes sparkling clean swimming pool water

- 1 Balance**
- 2 Sanitize {this section will be highlighted or marked for this product}**
- 3 Shock**
- 4 Prevent Algae**

Reg. No. 30161 P.C.P. Act

KEEP OUT OF REACH OF CHILDREN

READ THE LABEL BEFORE USING

ACTIVE INGREDIENT :
Available chlorine present as calcium hypochlorite 52.1%

POISON

CORROSIVE TO EYES AND SKIN

DANGER. Strong oxidizer. Contamination or improper use may cause fire, explosion or the release of toxic gases. Add only into water. DO NOT use this product in any feeder, floater, skimmer or other dispensing device that has been used with any other product.

Innovative Water Care, LLC
2475 PINNACLE DR.
WILMINGTON DE 198031-800-654-6911

NET CONTENTS: 57 g – 34.1 kg

2023-6533
2024-07-09

For best results, use with other HTH® pool care products. For crystal clear pool water, follow our 4 step pool care program.

Step 1: Test and balance water.

Step 2: Sanitize

Step 3: Shock regularly.

Step 4: Add algaecide as directed.

DIRECTIONS FOR USE:

Maintain daily levels as determined by a test kit or test strips:

Free available chlorine:	1-3 ppm
pH:	7.2-7.8
Total alkalinity:	80-120 ppm
Calcium hardness:	200-300 ppm

METHOD OF APPLICATION: Add the required dosage of this product during evening hours while the filter is running. Measure with a clean, dry spoon or cup used solely for this purpose. Broadcast the product evenly over a wide area in the deepest part of the pool. Direct contact may cause bleaching of vinyl or painted pool surfaces. If any granules settle to the bottom of the pool, use brush to disperse. Let filter pump run 6 to 8 hours minimum after applying.

DOSAGE:

START-UP: When opening your pool, shock treat by adding 200 g of this product per 10,000 L of water. Repeat dosage as needed until the free available chlorine is 1-3 ppm. For best results, shock treat at dusk.

ROUTINE CHLORINATION: For pools stabilized with cyanuric acid, add 40 g of this product per 10,000 L of pool water every other day or as needed to maintain proper chlorine residual between 1-3 ppm. For unstabilized pools, add 80 g of this product per 10,000 L of pool water daily or as needed to maintain proper chlorine residual between 1-3 ppm.

Note: Hot weather, heavy pool usage, and rain may require higher usage rates to maintain proper chlorine residuals. For outdoor pools, chlorine residuals can be protected from destruction by sun's rays by addition of stabilizer (cyanuric acid).

SHOCK TREATMENT: Shock treat weekly using 200 g of this product per 10,000 L of water when average daily temperature is above 25°C, otherwise shock treat every other week. Shock treat to remedy problems which may occur when bather loads are high, water appears hazy or dull, unpleasant odors or eye irritation occurs, or after heavy wind and rainstorms. Do not enter pool until free available chlorine residual is 1-3 ppm.

ALGAE CONTROL: For visible algae, superchlorinate with 450 g per 10,000 L of pool water. Heavy algae infestation may require dosages up to 625 g per 10,000 L of pool water. Add this product close to any algae on the sides or bottom of the pool.

Note: Prolonged contact with pool surface may cause staining or bleaching. Immediately after treatment, thoroughly clean pool by scrubbing surface, vacuuming and cycling through the filter. If necessary, repeat the treatment. Pool should not be entered until the chlorine residual is 1-3 ppm.

WINTERIZING: While the water is still clear and clean, prepare for long periods of disuse by gradually applying 560 g of this product per 10, 000 L of pool water. Run the filter until dispersion is complete. Cover the pool with a plastic pool cover and prepare heater, pump and filter components for winter by following manufacturer's directions.

PRECAUTION STATEMENTS: KEEP OUT OF REACH OF CHILDREN. DANGER: Highly Corrosive.

Causes skin burns and irreversible eye damage. Harmful if absorbed through skin. May be fatal if swallowed. CORROSIVE to the eye. DO NOT get in eyes. Corrosive to the skin. DO NOT get on skin. Harmful if inhaled. Avoid breathing dust and fumes. Do not apply in windy conditions. . Wear eye protection, protective clothing, and rubber gloves when handling this product.. Remove and wash contaminated clothing before reuse. Wash thoroughly with soap and water after handling. Strong oxidizing agent. Dangerous gas formed when mixed with acid. Use only clean, dry utensils to dispense this product. Do not use this product in any feeder, floater, skimmer or other dispensing device that has been used with any other product. Do not mix with any other chemical. Do not allow product to contact any foreign matter, including other pool/spa treatment products. Do not allow to become wet or damp before use. Do not add water to this product. Add only into water. Do not mix this product in a small amount of water. If product is exposed to small amounts of water, it can react violently to produce heat and toxic gases and spatter. Contamination or improper use may start a chemical reaction that can give off heat and hazardous gasses and may cause a fire or explosion. Do not touch this chemical with a flame or burning material (like a lighted cigarette).

FIRST AID:

IF SWALLOWED: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

IN CASE OF EMERGENCY CALL: 1-800-654-6911.

TOXICOLOGICAL INFORMATION: Probable mucosal damage may contraindicate the use of gastric lavage. Treat symptomatically.

ENVIRONMENTAL HAZARDS: This product is toxic to aquatic organisms. Do not contaminate lakes, ponds, or streams by cleaning of equipment or disposal of wastes.

STORAGE: Store this product away from food or feed. Keep this product dry in its tightly closed container when not in use. Store in a cool, dry, well-ventilated area. Keep away from heat or open flame. Do not contaminate food or feed by storage or disposal or cleaning of equipment. This registration is granted under the *Pest Control Products Act* and does not exempt the user from any other legislative requirements.

<p>EMERGENCY HANDLING: In case of contamination or decomposition, do not reseal container. If possible, isolate container in open and well-ventilated area. Flood with large volumes of water.</p>

2023-6533
2024-07-09

DISPOSAL: Rinse container thoroughly before discarding. DO NOT reuse empty container. Dispose the empty container with household garbage. For disposal of a contaminated or decomposing product, see Emergency Handling. Unused or partially used products should be disposed at provincially or municipally designated hazardous waste disposal sites. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.

NOTICE TO USER: This pest control product is to be used only in accordance with the directions on the label. It is an offence under the *Pest Control Products Act* to use this product in a way that is inconsistent with the directions on the label.
