TotalEx® Super Concentrate Brush, Grass & Weed Killer Home Gardener

GENERAL PRODUCT INFORMATION:

TotalEx® Super Concentrate Brush, Grass & Weed Killer Home Gardener is a nonselective herbicide. It controls most annual and perennial grasses, such as lawn grasses, quackgrass, broad leaf weeds such as chickweed, ragweed, knotweed, poison ivy, Canada thistle, milkweed, bindweed; most brush such as poplar, alder, maple and raspberry (i.e. virtually anything that is green and growing.)

It is absorbed by the leaves and moves throughout the stem and roots to control the entire plant. Mature perennial weeds should be treated after seed heads, flowers or fruit appear. All plants are most easily controlled in the young, actively growing, seedling stage.

TotalEx® Super Concentrate Brush, Grass & Weed Killer Home Gardener wilts and browns plants within 48 hours. Plants usually dry up within 7 to 14 days. TotalEx Super Concentrate Brush, Grass & Weed Killer Home Gardener has no soil activity and will not run off to affect nearby vegetation. To ensure that TotalEx Super Concentrate Brush, Grass & Weed Killer Home Gardener gets down to the roots, avoid tillage or disturbing the treated area for 7-10 days after treatment or as directed below. Make sure the spray contacts only those plants that you want to kill. TotalEx Super Concentrate Brush, Grass & Weed Killer Home Gardener will damage or kill any desirable plants it contacts. Use a repeat application on any seedlings that regrow from seeds.

PRECAUTIONS FOR USE: Avoid spray contact with desirable plants as any plant contacted may be killed. Do not spray in windy conditions. Do not spray to the point of run-off. Heavy rainfall immediately after application may wash the chemical off the foliage and repeat treatment may be required. Do not apply if rainfall is forecast for the time of application.

DIRECTIONS: Glyphosate is not to be applied using hand-wicking or hand-daubing methods. Ensure uniform and complete spray coverage but not to point of runoff.

For a 7 g/L spray solution: mix 40 mL of product in 2 L of clean water (1 part TotalEx Super Concentrate Brush, Grass & Weed Killer Home Gardener to 20 parts water). Apply the 2 litres of spray solution to the equivalent of 40 m² (2 paces by 20 paces or 4 paces by 10 paces).

For a 14 g/L spray solution: mix 80 mL of product in 2 L of clean water (1 part TotalEx Super Concentrate Brush, Grass & Weed Killer Home Gardener to 20 parts water). Apply the 2 litres of spray solution to the equivalent of 80 m² (4 paces by 20 paces or 8 paces by 10 paces).

NOTE: Mix only enough spray solution to treat intended area. Rinse sprayer thoroughly after each use. Do not store spray mixture in sprayer for prolonged periods. Do not use hose-end sprayers.

For control of undesirable vegetation around buildings, lawn trimming/edging, patio weed control, vacant lots, storage & recreational areas, driveways, hard to mow areas and other similar areas: Apply to vigorously growing plants. Apply to annual weeds anytime after emergence. For perennial weeds apply after seed heads, flowers or berries appear.

Around trees / shrubs / ornamentals: Apply around base in a neat fashion. Avoid spray or drift contact with foliage, stems or green bark of desirable plants.

Lawn / garden renovation: For best results on lawns, skip one mowing prior to treatment. Allow at least 3 days after treatment before disturbing the soil and/or replanting.

Brush control: Apply after leaves are fully expanded. Treat trees and brush up to 1.5 m in height only; for taller trees and brush, cut back to 1.5 m or cut down and spray regrowth. Controls most brush such as poplar, alder, maple and raspberry.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. CAUSES EYE IRRITATION. HARMFUL IF SWALLOWED. Avoid contact with eyes or prolonged contact with skin. Do not allow others such as children and pets on treated areas during application or to re-enter treated areas until spray has dried. Wash immediately after using this product. Do not contaminate foodstuffs, seed or feed by storage or disposal.

FIRST AID: If on skin or clothing, take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice. If swallowed, call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. If in eyes, hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically.

DISPOSAL: Rinse container and empty rinsings into sprayer. Do not reuse empty container. Dispose of empty container with household garbage.
